Foreword

In 1995, the Health Education Framework and Assessment Task Force, as part of the Healthy Schools! Healthy Kids! Initiative, began work on the development of a health education framework including health education content standards for Rhode Island. In July, 1996, the Rhode Island Health Education Framework, Health Literacy for All Students was endorsed by the Board of Regents of Elementary and Secondary Education. In the course of the Task Force's deliberations, it became evident that the state's Health Education Instructional Outcomes needed to be aligned with these new standards, particularly in light of the state's move to standards-driven, instruction and performance-based assessment. In addition, the health information in the original Outcomes needed updating to reflect current health knowledge. Several ad hoc committees had been convened by the Department of Education to update the Outcomes periodically, but a concerted effort to review and update all of the content areas had to be undertaken. With the advent of the Health Education Framework, it became clear that now was the time to update the outcomes and align them with the new standards for health education.

A committee of teachers, a representative from higher education, consultants and Department of Education, Department of Health and Department of Mental Health, Retardation and Hospitals staff, many of whom had also served on the Framework Task Force, began meeting in February of 1997. Working with a consultant, Andrea Ferreira, this Outcomes Revision Committee carried out the task of reviewing the original Outcomes, updating the health information in each content area, removing redundancies, categorizing content for grade categories and developing a format in which to present the aligned outcomes and standards. The Committee met regularly from February through December to ensure accuracy, alignment with the standards, appropriateness of content, user-friendliness and compliance with state rules and regulations of these revised outcomes.

Deborah A. Gist
Commissioner of Education
Rhode Island Department of Education

April, 1988
Revised: July, 1992; January, 1998
August, 2003; August, 2012; March, 2015
Acknowledgments

The Rhode Island Department of Education wishes to thank all the members of the Outcomes Revision Committee for accepting the challenge of revising and aligning the Outcomes with the health education standards. The task was difficult, but mutual respect and good humor prevailed.

Health Education Instructional Outcomes Revision Committee:
Kenneth M. Ascoli, Bristol-Warren Regional Schools: Department Head, K-12 Physical Education and Health
Marcia Campbell, Department of Education: Health Education Specialist
Tracy Caravela, PhD, Rhode Island College, Assistant Professor, Health Education
Cynthia Y. Corbridge, Department of Education: Health Education Assessment Specialist
Carol Cummings, PhD, Health Education Consultant
Andrea V. Ferreira, MPH, CHES, Health Education Consultant
Donald P. Galamaga, Department of Mental Health, Retardation and Hospitals: Executive Director
Linda Nightingale Greenwood, Department of Education: Manager, Comprehensive School Health Programs
Jackie Harrington, Department of Education: HIV/AIDS Specialist
Wanda Lukas, Mt. Hope High School: Teacher, Health and Physical Education
Anne Maack, North Kingstown High School: Teacher, Health Education
George McDonough, Department of Education: Coordinator, Safe and Drug-Free Schools
Catherine Moffitt, Hope Valley Elementary School: Teacher, Health and Physical Education
Rosemary Reilly-Chammat, Department of Health: Program Manager
Kathy Santosuosso, Isaac Paine School: Teacher, Health and Physical Education
Rene Sullivan, Jamestown School Department: School Nurse-Teacher
Andrea Vastis, Department of Health: Public Health Promotion Specialist
Janet Watkinson, Newport School Department: School Nurse-Teacher
Heidi Willner, Johnston High School: Teacher, Health Education

Special recognition and enormous appreciation go to Andrea Ferreira, our consultant. Her unfailing professionalism, intelligence, patience and diligence (not to mention her ability to take the views of a dozen people and produce such fine work) have resulted in a product of which we can all be proud.

Thank you also to the Healthy Schools! Healthy Kids! (HS!HK!) Initiative, funded by a Cooperative Agreement (U87/CCU109023-06) with the Centers for Disease Control and Prevention (CDC) through 2002. Through this initiative health education enjoys continued support as one of seven interdependent components of a comprehensive school health program. The HS!HK! Initiative has served as a resource for and reinforcement of standards-based teaching and learning, guided by a health education framework similar to those crafted in other core areas: English Language Arts, Mathematics and Science.

Special Acknowledgements (2012)

The Rhode Island Department of Education wishes to thank Denise Johnson, Barrington Public Schools K-12 Physical Education and Health Department Head; Anna M. Burke, CSNT, M.Ed.; and Lawrence P. Filippelli, Ed.D., Assistant Superintendent, Scituate School Department for their continued support, guidance, and contributions during the 2011-2012 revision process.
Overview

This document is designed to complement the Rhode Island Health Education Framework, Health Literacy for All Students. It partners with the Framework to provide curriculum committees in local districts a resource to help them develop, evaluate, revise and improve existing Kindergarten (K) – 12 health education curricula.

The Framework clearly articulates the role of health education in school reform, the relationship of health education to each of the components of a comprehensive school health program as well as health literacy, and the Rhode Island Common Core of Learning. For a thorough understanding of the aforementioned, the reader is encouraged to read pages 1 - 8 of the Rhode Island Health Education Framework: Health Literacy for ALL Students.

In the Framework, Rhode Island’s Health Education Standards (pages 9-20) clearly present high expectations for all students. They describe what all students should know and be able to do in health education. Performance descriptions are provided for each of the seven standards. The performance descriptions illustrate what achieving each standard looks like at four stages during a student’s schooling, K, grade 4; grades 5 – 8, grades 9 – 10 and grades 11 and 12. There are strong connections between and among the standards and performance descriptions. None is an isolate. The performance descriptions formed the roots of the revised outcomes.

Rhode Island’s Rules and Regulations for School Health Programs (RI16-21-SCHO) as amended in January 1996¹ (found in the Appendix A of the Framework), promulgate a “comprehensive, planned and sequential arrangement of learning opportunities” for students. The Rules and Regulations outline specific “health instructional outcomes” which include no fewer than the following topics: AIDS; alcohol, tobacco and other substance abuse; child abuse; community health; consumer health; cardiopulmonary resuscitation; environmental health; sexuality and family life; human growth and development; mental health; nutrition; prevention and control of disease; physical fitness; safety and injury prevention; and suicide prevention. To date, these outcomes have been presented by content area clusters in the Rhode Island Department of Education document Comprehensive Health Instructional Outcomes, published in April, 1988 and revised in July, 1992. The outcomes that follow this introduction were aligned with the seven health education standards by attaching content specific topics to the performance descriptions for each standard.

¹ General Laws of Rhode Island, Chapters 16-21 and 35-4 and section 23-1-18(4)
The Role of Health Education

Health education is part of an essential strategy to affect positively the health and education of children. When children are healthy, they can learn; when they are educated, they can stay healthy. Clearly, because education and health go hand-in-hand, an investment in educating our children about becoming and staying healthy leads to positive outcomes. Our children become better learners, and improve the quality of their lives and of the society in which they live. Ultimately, they will work and contribute to society as productive citizens.

However, research indicates that young people today are less healthy than those of recent generations. The Health Education Framework lists some of the statistics (pages 4-5) which call for a concerted response from all those who care for children and youth. For example, nearly half of young people aged 12 - 21 are not vigorously active on a regular basis. The prognosis is increased cardiovascular disease, cancer, and many other chronic conditions. More youth carry weapons than ever before. The result is intentional and unintentional injury, which is now the leading cause of death among 15 to 24 year olds. The Centers for Disease Control and Prevention (CDC) has identified six categories of risk behaviors in today’s students: 1) Behaviors that result in unintentional and intentional injuries; 2) Tobacco use; 3) Alcohol and other drug use; 4) Sexual behaviors that result in HIV infection, other STDs, and unintended pregnancy; 5) Dietary patterns that contribute to disease; and 6) Insufficient physical activity. These risk behaviors are preventable!

A comprehensive approach is required to assist students to become motivated to improve and maintain their health, prevent disease and injury and reduce risk. Health education is part of that comprehensive approach. Research tells us that while health knowledge can change with health instruction, a minimum of 40-50 hours of health education is needed in order to impact behaviors. Health education is about prevention. A planned and sequential K-12 health education curriculum addresses all dimensions of health in a way that results in students who possess the knowledge and skills to live a healthy life.

---

Health Education Curriculum Development

This document is primarily designed for use by those involved in K-12 comprehensive health education curriculum development at the district and grade level. It is meant to serve as a guideline and resource for those in a school district charged with developing sequential teaching, learning and assessment opportunities for students K – 12.

According to the Rhode Island Health Education Framework, curriculum development

"is more than simply arranging knowledge into manageable chunks. A good curriculum is more than a syllabus; it addresses multiple objectives simultaneously and envisions experiences for student that will provoke their curiosity, spark their imaginations and deepen their understanding [through] inquiry-based, resource-rich teaching and learning."  

Effective curricula are marked by opportunities for active participation of students in the learning process including student-centered activities such as dialogue, role play, group projects and discussion. Students come to know something not by just acquiring information, but by interpreting and relating it to previously acquired knowledge. The use of a variety of approaches for teaching and learning, such as cooperative learning, mastery learning, peer coaching and other strategies, interfaces with diverse student learning styles.

Four phases have been identified as guide posts for curriculum development and improvement (RI Educational Leadership Academy and the RI Association for Supervision and Curriculum Development, 1988). They are planning, development, implementation, and evaluation. Each of these phases is presented below, accompanied by a series of questions curriculum developers can ask themselves as they seek to develop or revise their district health education curriculum so that it is aligned with the health education standards and revised outcomes. The questions provide flexibility in approaching the development process as well as a "checklist" for the work at hand. Once the work is underway, curriculum committees may find there are still other questions they need to answer such as “Are we following our plan?” “Is this working?” “Have we planned to review our work periodically?”.

---

Phase I: Planning

This, the initial phase of the curriculum development and improvement process, involves (1) establishing a planning process and structure, (2) developing philosophy and goals, and (3) assessing current curricula and the configuration of health education in the district or school. Curriculum developers may want to ask themselves the following questions:

- Who should be at the table to work on this curriculum? Is there K-12 representation here?
- What provision has been made to involve the community in the process?
- What is currently being taught?
- Who is teaching what and when?
- How much time is available for teaching?
- What is the current scope and sequence of health education?
- What are common themes across grades K - 12?
- How is the curriculum currently organized? by theme? by topic? by skills?
- How are current health issues addressed?
- Where are the gaps?
- Where are the linkages with other subject areas?
- To what resources do we have access, including books, data, experts, etc.?
- What are students interested in learning?
- How does the curriculum at each grade level prepare students to meet the standards assessed in the Rhode Island State Health Performance Assessment administered at grades 5 and 9?
Phase II: Development

This, the second phase of the process, involves (1) developing scope and sequence, and (2) selecting teaching, learning and assessment strategies. Questions to consider include the following:

- How should the curriculum be organized: by standards? by risk behaviors? by content or concepts? by skills? by theme?
- How does this curriculum reflect the health education standards and outcomes?
- How is the document teacher friendly?
- To what extent are various methods of student assessment provided?
- How comprehensive is the curriculum?
- What teaching and learning strategies does the curriculum employ?
- How does this curriculum address the needs of diverse learners?
- What resources are available to assist in developing this curriculum?
- Does the curriculum include suggested materials and resources for teachers?
- How does this curriculum reflect community needs? values? mores?

Phase III: Implementation

Implementation represents the process of transforming curriculum plans into actual teaching and learning. Curriculum developers may want to consider:

- What is the plan for implementation?
- What kind of professional development is needed?
- What kind of ongoing peer support is needed during implementation?
- What resources are needed for implementation?
- What community assets are available?
- What kind of administrative support is needed to implement the curriculum most effectively?
- What kind of support materials need to be developed to aid in implementation (e.g. form letters to parents)?
- What is the plan for introducing the curriculum to the community?
Phase III: Evaluation

Evaluation involves developing a mechanism to track the progress of implementing the curriculum and its intended goals. It answers the questions, “Does the curriculum provide a K-12 scope and sequence? Does it provide for a variety of teaching and learning styles? Does it align with Rhode Island’s health education framework and assessments? Does it meet the needs of our students and teachers?” In other words, how does this curriculum work? Evaluation involves developing a method and tools to measure whether or not the goals established through the curriculum process and the curriculum itself have been reached. Evaluation also allows the curriculum committee to review the implementation plan to see what worked and what needs to be improved. It provides a process for determining curriculum effectiveness and a mechanism for feedback in order to revise the curriculum in the future.

In creating an evaluation plan for a standards-based curriculum, curriculum developers must decide in the planning phase what they want to know about the curriculum, such as, but not limited to:

- What are the indicators that your curriculum has been effectively implemented?
- Has it been implemented according to agreed upon specifications?
- How closely is the curriculum aligned with the standards?
- How do the teachers of health education use the curriculum?
- What impact has it had on student knowledge, attitudes, and skills?
- Are our students meeting or exceeding the performance standards set by the Board of Regents?
- How will the curriculum be reviewed and revised?

The evaluation process also addresses the mechanisms for evaluating student performance:

- What kinds of classroom scoring guides are used for each of the seven standards?
- What are the multiple modes of assessment employed?
- What are the rubrics used to assess the quality of student work?
- What provision is used to measure student achievement?
How to Read and Use the Outcomes

The Revised Outcomes are grouped by four grade categories: Kindergarten through Grade 4, Grades 5 through 8, Grades 9 - 10 and Grades 11 - 12. The Outcomes are arranged in table form with each column headed by one of the seven health education standards. The amount of content and skills vary from standard to standard. The standards and outcomes are not independent of one another. None is meant to be considered in isolation. They are complementary. Even a cursory review across a table will show the interrelationships. Curriculum developers need to be aware of those interrelationships as well as the opportunities for interdisciplinary approaches.

A notation is made throughout the document of "Required Topics". These are listings of the minimum content required by law. Where Required Topics are not listed separately, the content of the outcome itself establishes the minimum content.

In many cases, these health education outcomes overlap with other health content areas and/or can be linked with other subject areas, such as Science, Mathematics, English Language Arts, Social Studies and Family Life and Consumer Science. This is also indicated at the bottom of each table.

A general instructional goal for the content area at that grade level is presented at the top of the page. In most cases all the outcomes for the entire grade grouping (e.g. K - 4) are on one or two pages. Refer to the diagram on the following page to become familiar with the features and layout.

The Seven Content Areas

Each of the seven content areas presented in this document encompasses the wide variety of topics inherent to the goal of improving and maintaining health, and preventing disease and injury.

A rationale precedes the health education instructional outcomes for each of these seven content areas.

<table>
<thead>
<tr>
<th>Seven Content Areas of RI’s Health Education Instructional Outcomes</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Personal Health (including Physical Activity and Wellness)</td>
</tr>
<tr>
<td>2. Mental and Emotional Health</td>
</tr>
<tr>
<td>3. Injury Prevention</td>
</tr>
<tr>
<td>4. Nutrition</td>
</tr>
<tr>
<td>5. Sexuality and Family Life</td>
</tr>
<tr>
<td>6. Disease Prevention and Control</td>
</tr>
<tr>
<td>7. Substance Use and Abuse Prevention (including alcohol, tobacco and other drugs, or ATOD)</td>
</tr>
</tbody>
</table>
**Overall Instructional Goal:** Students will understand the structure and function of the human body, its major systems, and the significant role of physical activity in maintaining a high level of wellness.

**Features of the Table: Health Education Instructional Outcomes Aligned with the Standards**

<table>
<thead>
<tr>
<th>GRADES K-4</th>
<th>Standard 1: Understand concepts related to health promotion and disease prevention as a foundation for a healthy life.</th>
</tr>
</thead>
<tbody>
<tr>
<td>STUDENTS WILL</td>
<td>1. Describe relationships among health, environment, physical activity, lifestyle and individuals.</td>
</tr>
<tr>
<td></td>
<td>2. Identify indicators of health-related fitness during childhood. <strong>Required Topics:</strong> Benefits of physical activity, activities which contribute to fitness, changes in the body during physical activity, health-related fitness and performance-related fitness, various forms of physical activity.</td>
</tr>
<tr>
<td></td>
<td>3. Describe the basic structure and functions of the human body systems. <strong>Required Topics:</strong> Major role of each body part; interrelationships of body systems; muscular, skeletal and respiratory systems; the effect of these systems on the size, shape and movement of the body; the body’s response to physical activity; pain and postural defects, their identification and treatment; oral health and hygiene, including prevention of tooth decay; the senses and how one learns through them; uniqueness of each person’s genotype and rate of growth; acceptance of one’s own unique body; accepting physically challenged individuals.</td>
</tr>
<tr>
<td></td>
<td>4. Describe how physical activity is influenced by physical, social, emotional and family environments. <strong>Required Topics:</strong> Promoting the health of muscles and bones; family activities; physical, social and emotional benefits of physical activity and exercise; barriers to physical activity and wellness; short and long-term effects of lifestyle choices on wellness.</td>
</tr>
<tr>
<td></td>
<td>5. Explain how simple injuries from physical activity can be prevented or treated. <strong>Required Topics:</strong> One of preventative gear, including mouth guards, pads and helmets; warm up and cool down activities; care of simple injuries.</td>
</tr>
</tbody>
</table>

| STUDENTS WILL | 1. Identify characteristics of valid personal health information and health-promoting products and services. **Required Topics:** Sources of information regarding physical activity, hygiene-related products. | **Overlap:** COM, CON, NUT. |
| | 2. Demonstrate the ability to locate resources from home, school and community that provide valid information about personal health, including physical activity, hygiene-related products, community resources. | **Overlap:** COM, CON, NUT. |
| | 3. Explain how media influences the selection of information about physical activity, personal hygiene, and other wellness information. **Required Topics:** Advertising and personal hygiene products, the value of “sleek” physical fitness equipment and services, use of role models and personal health choices. | **Overlap:** NUT. |
| | 4. Demonstrate the ability to locate school and community health helpers in the area of physical activity, personal hygiene and overall wellness. | **Overlap:** NUT, MH. |

| STUDENTS WILL | 1. Demonstrate awareness of the influence of culture upon personal health behaviors. **Required Topics:** Physical activity habits; hygiene practices; local customs, use of substances. | **Overlap:** STM. |
| | 2. Explain how media influences thoughts, feelings and behaviors about personal health. **Required Topics:** Physical activity habits, self-esteem; media role models. | **Overlap:** INJ. |
| | 3. Describe ways technology can influence personal health. **Required Topics:** State of the art improvements in physical activity equipment; e.g., computerized exercise equipment. | **Overlap:** STM. |
| | 4. Compare physical activity behaviors that are safe to those that are risky or harmful. | **Overlap:** INJ. |

**Overlap refers to specific health content areas which share related outcomes.**

**“Required Topics” specify the minimum required content. Where topics are not listed, the outcome becomes the required content.**

- NUT = nutrition
- PSIL = personal health
- INJ = injury prevention
- DCP = disease control and prevention
- MH = mental & emotional health
- SFL = sexuality & family life
- SAP = substance abuse prevention

Footnote indicates general areas of overlap with other health content areas and links with other specific content areas.

STUDENTS WILL DEMONSTRATE THE ABILITY TO:

1.1. describe relationships among heredity, environment, physical activity, lifestyle and individual well-being. (REQUIRED TOPICS: characteristics of a fit and an unfit individual; health practices and levels of wellness; effects of age, gender, and health status on physical activity levels; the environment and how it influences personal health.)

1.2. identify indicators of health-related fitness during childhood. (REQUIRED TOPICS: benefits of physical activity; activities which contribute to fitness; changes in the body during physical activity; health-related fitness and performance-related fitness; various forms of physical activity;)

1.3. describe the basic structure and functions of the human body systems. (REQUIRED TOPICS: major role of each body part; interrelationships of body systems; muscular, skeletal and respiratory systems; the effect of these systems on the size, shape and movement of the body; posture and postural defects, their identification and treatment; oral health and hygiene, including prevention of tooth decay; the senses and how one learns through them; uniqueness of each person's pattern and rate of growth; acceptance of one's own unique body; accepting physically challenged individuals) CONTINUED

2.1. identify characteristics of valid personal health information and health-promoting products and services. (REQUIRED TOPICS: sources of information regarding physical activity; hygiene-related products) Overlap: NUT

2.2. locate resources from home, school and community that provide valid information about personal health, including physical activity. Overlap: NUT

2.3. explain how media influences the selection of information about physical activity, personal hygiene, and other wellness information. (REQUIRED TOPICS: advertising and personal hygiene products; the value of "special" physical fitness equipment and services vs. no-cost activities; use of role models and personal health choices.) Overlap: NUT

2.4. locate school and community health helpers in the area of physical activity, personal hygiene and overall wellness. Overlaps: NUT, MH

2.5. describe the relationship between personal health products and services and money. (REQUIRED TOPICS: how to select and purchase basic safety equipment (e.g. helmets) avoiding "quackery" products)

3.1. identify responsible personal health behaviors. (REQUIRED TOPICS: use of protective gear; seat belt use; responsible physical activity including safe and controlled movements; potential risks; safe use of physical activity equipment; care of the body; good posture; need for sleep; managing stress; effects of substances on personal health and performance in physical activity) Overlaps: NUT, MH, INJ, SAP

3.2. identify personal health needs and health habits pertaining to physical activity, hygiene, nutrition and other aspects of wellness. Overlaps: SAP, NUT, MH

3.3 compare physical activity behaviors that are safe to those that are risky or harmful. Overlap: INJ

3.4. identify responsible personal health behaviors. (REQUIRED TOPICS: appropriate behaviors for participating with others in physical activity; cooperation and sharing; conflict and communication in relationships with family members, friends) Overlap: MH

4.1. explain the influence of culture upon personal health behaviors. (REQUIRED TOPICS: physical activity habits; hygiene practices; food choices; use of substances)

4.2. explain how media influences thoughts, feelings and behaviors about personal health. (REQUIRED TOPICS: physical activity habits; self-esteem; media role models)

4.3. describe ways technology can influence personal health. (REQUIRED TOPICS: state-of-the-art improvements in physical activity equipment - e.g. computerized exercise equipment)

4.4. explain how information from school and family influences personal health.

5.1 identify healthy ways to express needs, wants, and feelings. (REQUIRED TOPICS: identifying appropriate physical activities)

5.2. identify physical activity levels; the size, shape and movement of the body part; interrelationships of body systems; physical activity habits; hygiene

5.3 identify healthy ways to express needs, wants, and feelings. (REQUIRED TOPICS: identifying appropriate physical activities)

5.4. identify physical activity levels; the size, shape and movement of the body part; interrelationships of body systems; physical activity habits; hygiene

5.5 identify healthy ways to express needs, wants, and feelings. (REQUIRED TOPICS: identifying appropriate physical activities)

5.6 apply a decision-making process to a personal health issue. (REQUIRED TOPICS: identifying appropriate physical activities and selecting one for personal implementation)

6.1. identify healthy ways to express needs, wants, and feelings. (REQUIRED TOPICS: identifying appropriate physical activities)

6.2. explain when it is appropriate to ask for assistance in making personal health decisions and selecting personal health goals. (REQUIRED TOPICS: selecting appropriate physical activities)

6.3. predict outcomes of specific decisions about personal health. 6.4. identify and track progress toward its achievement.

6.5 identify physical activity levels; the size, shape and movement of the body part; interrelationships of body systems; physical activity habits; hygiene

6.6 identify physical activity levels; the size, shape and movement of the body part; interrelationships of body systems; physical activity habits; hygiene

6.7. discuss accurate information and express opinions about personal health issues. 6.8 apply a decision-making process to a personal health issue. (REQUIRED TOPICS: identifying appropriate physical activities)

7.1. discuss accurate information and express opinions about personal health issues. 7.2. describe a variety of methods that convey accurate information and ideas about personal health, including physical activity. 7.3. identify community agencies that advocate for wellness, including physically active individuals, families and communities. 7.4. identify and track progress toward its achievement. 7.5. discuss accurate information and express opinions about personal health issues. 7.6. identify community agencies that advocate for wellness, including physically active individuals, families and communities. 7.7. discuss accurate information and express opinions about personal health issues. 7.8 apply a decision-making process to a personal health issue. (REQUIRED TOPICS: identifying appropriate physical activities)

7.9. identify and track progress toward its achievement. 7.10. discuss accurate information and express opinions about personal health issues. 7.11. identify community agencies that advocate for wellness, including physically active individuals, families and communities. 7.12. discuss accurate information and express opinions about personal health issues. 7.13. identify community agencies that advocate for wellness, including physically active individuals, families and communities. 7.14. identify and track progress toward its achievement. 7.15 discuss accurate information and express opinions about personal health issues.

7.16. discuss accurate information and express opinions about personal health issues.
Overall Instructional Goal: Students will understand the basic structure and function of the human body, its major systems, and the significant role of physical activity in maintaining a high level of wellness.

| Standard 5: Students will demonstrate the ability to use interpersonal communication skills to enhance health. |
| Standard 6: Students will demonstrate the ability to advocate for personal, family, community, and environmental health. |
| Standard 7: Students will demonstrate the ability to work cooperatively when advocating for individual, family, and school and environmental safety. |

**STUDENTS WILL DEMONSTRATE THE ABILITY TO:**

1. **Required Topics: concepts related to health promotion and disease prevention as a foundation for a healthy life.**
   - Grades 5-8:
   - Students will understand concepts related to health promotion and disease prevention as a foundation for a healthy life.
   - (Required Topics: concepts of physical activity, exercise, and performance-related fitness and health-related fitness; exercise and rest; aerobic exercise; positive contributions of physical activity to health; relationship of physical activity to reduction of risk for chronic disease; measures to reduce risk of heart disease; other benefits of various forms of physical activity (energy level, capacity to manage stress, self-esteem); various forms of physical activity; principles of training and conditioning for specific physical activities; physical activity and weight management)

2. **Describe the interrelationship of mental, emotional, and behavioral health during adolescence.**
   - (Required Topic: Social and emotional benefits of physical activity and overall personal wellness)

3. **Explain how health is influenced by the interaction of body systems.**
   - (Required Topics: circulatory system - anatomy and physiology; factors affecting health of the circulatory system (e.g., substances, heredity, diet, etc.); what to do when heart stops beating; respiratory system - anatomy and physiology; examples of respiratory diseases and their effects; process for resuscitation; ways to protect the respiratory system; changes in body systems as fitness improves; digestive system - anatomy and physiology; factors affecting health of the digestive system)

4. **Analyze the validity of personal health information, products, and services.**
   - (Required Topics: sources of information about nutrition and physical activity)

5. **Utilize resources from home, school, and community that provide valid personal health information.**
   - (Required Topics: sources of products and services)

6. **Analyze how media influences the selection of personal health information, products, and services.**
   - (Required Topics: use of role models; celebrities in advertising and other advertising strategies)

7. **Compare the costs and validity of personal health products and services.**
   - (Required Topic: Quackery)

8. **Describe physical activity situations requiring professional services.**
   - (Required Topics: dealing with injuries; athletic training; health practices harmful to self or others)

9. **Explain the importance of assuming responsibility for physical activity, hygiene, and care of the body.**

10. **Explain personal health habits to determine health strengths and risks.**
    - (Required Topics: level of physical activity; errors in personal movement patterns (e.g., posture); knowing when to revise activity level)

11. **Distinguish between safe and risky or harmful health behaviors.**
    - (Required Topics: Analyzing potential risks related to physical activity and the environment)

12. **Apply strategies to improve or maintain personal health.**
    - (Required Topic: Quackery)

13. **Identify opportunities for regular participation in physical activity; activities which promote high levels of CV fitness.**
    - (Continued)

14. **Describe the influence of cultural and family beliefs on health behaviors and the use of personal health services.**
    - (Required Topics: Physical activity practices; use of physical activity expressions; expressions of culture through various health activities - e.g., dance, food selection and other practices)

15. **Analyze how positive and negative messages from media and other resources influence personal health behaviors.**
    - (Required Topics: Selecting appropriate physical activities; avoiding excessive physical activity to lose weight; decisions about eating patterns, care for body; integrating mental and emotional health into all areas of health)

16. **Predict how decisions regarding risk-taking behaviors have consequences for self and others.**
    - (Required Topics: Cause and effect; risks and consequences)

17. **Apply strategies and skills needed to attain personal health goals.**

18. **Develop a plan that addresses personal strengths, needs, and health risks.**
    - (Required Topics: Selecting appropriate physical activity levels; avoiding excessive physical activity to lose weight; decisions about eating patterns, care for body; integrating mental and emotional health into all areas of health)

19. **Use interpersonal communication skills to enhance health.**

20. **Use valid personal health information.**
    - (Required Topics: Use of interpersonal communication skills to enhance health)

21. **Advocate for personal, family, community, and environmental health.**

22. **Work cooperatively when advocating for individual, family, and school and environmental safety.**
    - (Required Topic: Compliance and non-compliance with game rules and fair play)
Overall Instructional Goal: Students will understand the basic structure and function of the human body, its major systems, and the significant role of physical activity in maintaining a high level of wellness.

</tbody>
</table>

**Students Will Demonstrate the Ability To:**

- 1.1 describe relationships between one’s feelings and behaviors. *(Required topics: basic, complex and mixed emotions; situations provoking various feelings; self-concept; impact of success/failure on self-worth)*
- 1.2. identify indicators of mental and emotional health during childhood. *(Required topics: personal qualities/strengths; desirable traits; uniqueness of individuals)*
- 1.3. describe the connection of emotional health with the function of body systems. *(Required topics: stress; circulatory system; respiratory system; energy levels, etc.)*
- 1.4. describe the influence of family and friends on an individual's emotional health. *(Required topics: family structure; how people are similar & different; role of parents/guardians; ways to make friends; sharing; satisfaction through family & friends; mixed feelings and social pressures, respecting self and others)*
- 1.5. identify common childhood problems related to poor mental & emotional health *(Required topics: self-concept; caring & sharing; appropriate expression of feelings)*
- 1.6. identify mental health problems that should be detected and treated early. *(Required topics: dealing with feelings; signals of emotional problems; emotional or other abuse, bullying)*
- 1.7. explain how childhood illnesses related to poor mental or emotional health can be prevented or treated. *(Required topics: self-concept; stress/eustress & distress; role of family & friends)*

**Standard 2:**

- 2.1. identify responsible interpersonal behaviors *(Required topics: sharing; respecting others’ rights; differences; promoting cooperation)*
- 2.2. identify personal emotional and mental health needs.
- 2.3. compare behaviors that are safe to those that are risky or harmful. *(Required topics: expressing emotions appropriately; recognizing and reporting abuse and bullying; negative self-directed emotions and their effect on objective, responsible actions)*
- 2.4. compare behaviors that deal with stress well and those that deal with stress poorly. *(Required topics: self-management; emotional self-regulation; identification of stressful situations; asking for help)*
- 2.5. apply strategies to improve or maintain behaviors which enhance mental & emotional health. *(Required topics: exercise; communication with others; healthy ways of dealing with stress and bullying)*
- 2.6. identify and apply ways to avoid and reduce situations threatening mental or emotional health. *(Required topics: abuse & bullying; relationships with others; managing stress)*
- 2.7. recognize stressful situations and identify appropriate ways to manage them.

**Standard 3:**

- 3.1. explain the influence of family and culture on the range of emotional experience and expression.
- 3.2. explain how media influences thought, feelings and health behaviors. *(Required topics: poor communication; aggression, violence, bullying and abuse)*
- 3.3. compare ways that deal with stress well and those that deal with stress poorly. *(Required topics: self-management; emotional self-regulation; identification of stressful situations; asking for help)*
- 3.4. apply strategies to improve or maintain behaviors which enhance mental & emotional health. *(Required topics: exercise; communication with others; healthy ways of dealing with stress and bullying)*
- 3.5. explain how media influences thought, feelings and health behaviors. *(Required topics: poor communication; aggression, violence, bullying and abuse)*
- 3.6. apply refusal skills needed to enhance health. *(Required topics: self-management; emotional self-regulation; identification of stressful situations; asking for help)*

**Standard 4:**

- 4.1. distinguish between verbal and non-verbal communication. *(Required topics: recognizing facial and behavioral cues; empathy, compassion and tolerance)*
- 4.2. describes characteristics needed to be a responsible friend and family member. *(Overlap: SFL)*
- 4.3. demonstrate healthy ways to express needs, wants and feelings. *(Required topics: names of various emotions and situations which elicit them; how feelings affect ability to make rational choices and other behavior; impact of behaviors on others’ feelings)*
- 4.4. demonstrate ways to communicate care, consideration and respect of self and others. *(Required topics: rules for working cooperatively; listening skills; sharing; avoiding drug use)*
- 4.5. explain attentive listening skills needed to build and maintain healthy relationships. *(Required topics: making friends; influence of peers)*
- 4.6. apply refusal skills needed to enhance health. *(Required topics: self-management; emotional self-regulation; identification of stressful situations; asking for help)*
- 4.7. differentiate between negative and positive responses to conflicts situations *(Required topics: manage stress including bullying/cyberbullying; making and keeping friends)*

**Required Topics**: indicates that the content listed is the minimum amount required under state regulations.

**Overlap**: The content area of MENTAL & EMOTIONAL HEALTH lends itself to considerable overlap with the health content areas, namely: personal health (PSL), substance abuse prevention (SAP) and sexuality and family life (SFL).

Linkages with Social Studies, Science, English Language Arts, and Family Life & Consumer Science are also possible.

**HEALTH EDUCATION STANDARDS for MENTAL and EMOTIONAL HEALTH INSTRUCTIONAL OUTCOMES**

**Grades 9 - 10**

Overall Instructional Goals Grades 9 - 12: Students will understand that the level of one’s mental health is manifested by responsible decision-making, the development of healthy relationships, the management of stress and the complex emotional states of adolescence, adaptation to change throughout life and knowing when to seek help.

**STUDENTS WILL DEMONSTRATE THE ABILITY TO:**

1.1. analyze how mental and emotional health can impact health maintenance and disease prevention. (REQUIRED TOPICS: effect on judgement; anxiety and depression and susceptibility to disease.) Overlaps: PSL, DCP, SFL, INJ

1.2. describe the interrelationships of mental, emotional, social and physical throughout young adulthood. (REQUIRED TOPICS: self-image-personal, social, ideal; personal development over time; capacity and potential for personal growth and change; heredity and environment; fallacies regarding suicide; signs signaling suicide; eating disorders)

1.3. analyze the impact of emotional expression on the functioning of body systems. (REQUIRED TOPICS: anxiety; eustress; effect on performance, concentration, etc.; depression as a common emotional response to distress; positive mental/ emotional states and physical health)

1.4. analyze how the family, peers, community and environment are related with mental and emotional health. (REQUIRED TOPICS: peer pressure; violence in society.) Overlaps: SU

2.2. analyze resources from home, school and community that provide valid mental health information, e.g. identify adults at school, home, and community to go to for help for yourself or others. (REQUIRED TOPICS: different types of available assistance; elements and rationale of support systems)

2.4. access school and community resources and services for personal or family problems, and for treating alcohol.

2.6. analyze situations requiring professional health services (REQUIRED TOPICS: seeking help in reaction to signs of suicide.)

3.1. analyze the role of individual responsibility for healthy behaviors; maintaining healthy relationships. (REQUIRED TOPICS: choices and consequences; effects of emotions on behavior, judgment, and reason)

3.2. evaluate personal stress management habits to determine strategies for enhancing health and reducing risk. (REQUIRED TOPICS: sharing and facing a crisis with others and its effect on anxiety.)

3.3. analyze the short-term and long-term consequences of risky and harmful behaviors (REQUIRED TOPICS: personal feelings and attitudes about suicide; dealing with depression and/or anxiety; effects of dating violence and bullying/cyberbullying on victims).

3.4. outline strategies for dealing with mental and emotional health emergencies and crises, including suicide. (Overlaps: INJ, PSL)

3.5. research and evaluate strategies to manage stress in individuals.

4.1. analyze how cultural diversity enriches and challenges appropriate emotional expression. (REQUIRED TOPICS: cultural experiences, attitudes and practices)

4.2. evaluate the effect of media and other factors on personal, family and community expression of emotions, including sexual violence and dating violence.

4.4. analyze how information from the community, peers and others influences behaviors in response to emotions. (REQUIRED TOPICS: dealing with conflict; complex emotions)

5.1. apply skills for communicating effectively with the family, peers and others. (REQUIRED TOPICS: assertive behavior; listening skills; "befriending" skills to prevent suicide)

5.2. analyze how interpersonal communication effects relationships. (REQUIRED TOPICS: conflict resolution)

5.3. use healthy ways to express needs, wants and feelings, e.g. maintaining healthy relationships.

5.4. communicate care, consideration and respect of self and others.

5.5. apply strategies for solving interpersonal conflicts without harming self or others. (REQUIRED TOPICS: factors and steps in decision-making; on-going nature of decision making throughout life.)

5.6. apply refusal, negotiation; limit setting and collaboration skills needed to avoid potentially harmful situations. Overlaps: SFL, INJ

5.7. analyze the possible causes of conflict in schools, families and communities. Overlaps: INJ, COM

5.8. apply healthy strategies used to prevent conflict.

6.1. analyze the ability to use different strategies when making decisions related to mental and emotional health needs, e.g. seeking help for dating violence, sexual violence, sexual harassment, and bullying/harassment. (REQUIRED TOPICS: substance use; coping with stress; relationships; seeking help)

6.2. analyze mental health concerns that require individuals to work together. (REQUIRED TOPICS: suicide prevention; eating disorders; depression) Overlaps: NUT

6.3. predict immediate and long-term impact of emotional expression on the individual, family and community. (REQUIRED TOPICS: factors and steps in decision-making; on-going nature of decision making throughout life.)

6.4. describe how personal health goals are influenced by changes in information, abilities, priorities, and responsibilities.

6.5. compare and contrast a variety of mental health strategies that address personal strengths, needs and risks. (REQUIRED TOPICS: setting personal goals; self-contracts)

6.6. discuss accurate information about mental and emotional health issues, including suicide prevention and express opinions about the triggers of violence warning signs of dating violence/cycle of abuse; safety planning. (REQUIRED TOPICS: effects of Violence; including dating violence, bullying, cyberbullying, self-destructive behaviors, misdirected emotions on individual, family and society)

7.2. design methods for accurately expressing information and ideas about mental health promotion and suicide prevention.

7.3. utilize strategies to overcome barriers when communicating information, ideas and feelings about mental health issues.

7.4. influence and support others in making positive health choices, e.g. helping friends who are victims of dating violence, bullying, harassment, domestic violence community resources. (REQUIRED TOPICS: avoiding substances; seeking professional help/treatment; managing stress changing unhealthy behaviors) Overlaps: PSL, NUT, DCP

7.5. work cooperatively when advancing within healthy communities. (REQUIRED TOPICS: identifying community resources; laws addressing violent behaviors.)
Overall Instructional Goals Grades 9 - 12: Students will understand that the level of one's mental health is manifested by responsible decision-making, the development of healthy relationships, the management of stress and the complex emotional states of adolescence, adaptation to change throughout life and knowing when to seek help.

**STUDENTS WILL DEMONSTRATE THE ABILITY TO:**

1.1. analyze interrelationships of mental, emotional, social and physical health throughout life. (Required Topics: heredity and environment; depression & mental illness; maturation; key tasks in each stage of human growth and development) Overlaps: SFL, PSL

1.2. analyze how the family, peers, community and environment influence mental and emotional health. (Required Topics: victimization and abuse;) Overlaps: SFL, ENV, SFL

1.3. describe how to delay onset and reduce risks of potential life-long health problems relating to poor mental and emotional health. (Required Topics: alcoholism, drug dependency and treatment, depression in young adults; appropriate identification and expression of emotions)

2.1. evaluate resources from home, school and community that provide valid information about mental health and mental illness treatment for self and others.

2.2. evaluate situations requiring professional health services. (Required Topics: eating disorders, substance use, drug dependency, suicidal tendencies; depression and other mental illness; emotional, sexual, physical abuse; dating violence, sexual harassment, bullying/harassment) Overlaps: PSL, FL

2.3. evaluate opportunities for career choices in the field of mental health.

2.4. analyze the educational requirements, demands, rewards and benefits of a career in the field of mental health.

3.1. evaluate the effect of responsible behaviors on self, others and community. (Required Topics: avoiding ATOD; setting personal goals)

3.2. design a plan with recommended strategies to address a mental health issue in the local community which presents a threat to individual, family or community health. (Required Topics: violence: dating violence, impact of individual behaviors on family and society; suicide among youth) Overlaps: PSL, SFL

3.3. describe how to delay onset and reduce risks of potential life-long health problems relating to poor mental and emotional health. (Required Topics: alcoholism, drug dependency and treatment, depression in young adults; appropriate identification and expression of emotions)

3.4. research and evaluate strategies to manage stress by individual and groups within the family, at school, at work, or in other social situations.

4.1. research a school or community mental health issue resulting from the influence of culture, media, technology and other factors. (Required Topics: violence and aggression on TV; gangs, dating violence, bullying, cyberbullying, harassment) Overlaps: SFL, ENV, INJ

4.2. develop and implement a solution to a researched mental issue.

5.2. apply strategies to a selected situation that facilitate effective communication among individuals or groups, e.g. effects of sexting and long-lasting effects of types of negative shared digital media. (Required Topics: suicide prevention "befriending skills"; negotiation; conflict resolution)

6.1. evaluate different strategies when making decisions related to managing stress, and dealing with conflict. (Required Topics: analysis of personal goals; self-contracts for personal growth).

6.2. design, evaluate and implement a plan for attaining a personal mental health goal.

6.3. analyze the essential skills and strategies needed by an individual to enable him/her to develop, modify and implement effective plans to achieve and maintain optimum, lifelong health, e.g. healthy relationship skills; knowledge of safety planning for dating violence. (Required Topics: communication skills; various decision-making models)

7.1. discuss accurate information and express opinions about mental health issues.

7.2. adapt messages and techniques about mental and emotional health, including suicide prevention, to the characteristics of a particular audience.

7.3. influence and support others in making positive choices regarding their mental and emotional health.

7.4. work cooperatively when advocating for mental and emotional health promotion.

7.5. evaluate community health services and systems in place relating to mental health, suicide prevention and make recommendations for improving those systems and services.
3. INJURY PREVENTION
Grades K - 4

Overview: PSL:

Standard 1: Students will demonstrate the ability to access valid health information and health-promoting products and services.

- 2.4. demonstrate the ability to locate resources from home, school and community that provide help for injured individuals. (REQUIRED TOPICS: who should provide care; responding to an emergency; using 911)
- 2.5. describe the relationship between injury prevention products and money. (REQUIRED TOPICS: first aid products; home first aid kits; products promoting safety—child-proof caps, air bags in autos; crumbling glass; shatter-proof windshields; smoke detectors; fire extinguishers; importance of maintenance of bicycles, skateboards, motorcycles, etc.)

Standard 2: Students will demonstrate the ability to practice health-enhancing behaviors and reduce health risks.

- 3.1. identify responsible injury prevention and treatment behaviors (REQUIRED TOPICS: who should provide care; responding to an emergency; using 911)
- 3.2. identify need for personal safety and own injury prevention habits. (REQUIRED TOPICS: use of protective sports and play gear, seat belt use; use of medicines) (Overlap: SAP)
- 3.3. compare behaviors that are safe to those that are risky or harmful. (REQUIRED TOPICS: avoiding dangerous objects -- guns, knives, needles, injured animals; abiding by safety rules)
- 3.4. use strategies for preventing injuries. (REQUIRED TOPICS: use of bike helmets, seatbelts, avoiding dangerous items, places; abiding by safety rules e.g. bus)
- 3.5. develop injury prevention and management strategies for personal health. (REQUIRED TOPICS: reducing or eliminating the potential for injury in the home, school and play environment; fire safety; locking up dangerous substances and items in the home; infant/child issues)
- 4.1. explain how media influences thoughts, feelings and behaviors about injury prevention. (REQUIRED TOPICS: safety equipment use; violence as a means to resolve conflict and/or express feelings)
- 4.2. explain how media influences thoughts, feelings and behaviors about injury prevention. (REQUIRED TOPICS: safety equipment use; violence as a means to resolve conflict and/or express feelings)

Standard 3: Students will demonstrate the ability to use interpersonal communication skills to enhance health.

- 5.1. demonstrate healthy ways to express needs, wants, and feelings. (REQUIRED TOPICS: conflict and communication in relationships with family members, friends) (Overlap: MH)
- 5.2. differentiate between negative and positive responses to conflict situations. (REQUIRED TOPICS: what is conflict; verbal and physical fighting; use of weapons to resolve conflict)
- 5.3. understand and demonstrate non-violent strategies to resolve conflicts.

Standard 4: Students will analyze information and express opinions about injury prevention issues.

- 6.1. apply a decision-making process to an injury prevention issue. (REQUIRED TOPICS: decision-making models, e.g. identifying/defining problem; alternative solution, predicting consequences, choosing course of action, evaluating outcome.)
- 6.2. explain when it is appropriate to ask for assistance in preventing or treating injuries, including abuse or assault.

Standard 5: Students will demonstrate the ability to advocate for personal, family, community & environmental health.

- 7.1. discuss accurate information and express opinions about injury prevention issues.
- 7.2. describe a variety of methods that convey accurate information and ideas about preventing and treating injuries.
- 7.3. identify community agencies that advocate for prevention of injuries.
- 7.4. influence and support others in making choices about avoiding risks with potential for injuries. (REQUIRED TOPICS: peer support for prevention of injuries)
- 7.5. work cooperatively when advocating for injury prevention.

Students will demonstrate the ability to:

1.1. describe relationships between the causes and effects of injuries, including personal behaviors and injury prevention. (REQUIRED TOPICS: concept of prevention; need for basic safety rules in the home, at school and at play; pedestrian and traffic safety; bus safety; use of protective gear; auto safety, including use of car seats and safety belts; railroad safety)

1.2. describe the effect of injuries on the body. (REQUIRED TOPICS: "accidents" implies not under our control vs. injuries as predictable and preventable; burns; poisoning; falls; unintentional weapon injury; sports injuries; water/bathing injuries; biking; injuries related to occupation)

1.3. describe how physical, social, emotional and family environments influence personal safety. (REQUIRED TOPICS: Importance of listening to parents, safety personnel; paying attention to surroundings; potentially hazardous situations at home, school & play; safe vs. dangerous places to play; avoiding situations with risk for assault; access to tools, poisons, drugs, weapons; risk taking; school and home fire safety; water safety; playground equipment use and maintenance.) (Overlap: PS)

1.4. identify common injuries of children and their prevention. (REQUIRED TOPICS: pedestrian safety; auto safety, bicycle safety; residential safety; fire safety; water/bathing safety; firearms; fighting; identifying situations that threaten safety and may result in neglect or abuse) (Overlap: SFL)

1.5. identify common injuries of children and their prevention. (REQUIRED TOPICS: pedestrian safety; auto safety, bicycle safety; residential safety; fire safety; water/bathing safety; firearms; fighting; identifying situations that threaten safety and may result in neglect or abuse) (Overlap: SFL)

2.1. identify responsible injury prevention and treatment behaviors (REQUIRED TOPICS: who should provide care; responding to an emergency; using 911)

2.2. describe the relationship between injury prevention products and money. (REQUIRED TOPICS: first aid products; home first aid kits; products promoting safety—child-proof caps, air bags in autos; crumbling glass; shatter-proof windshields; smoke detectors; fire extinguishers; importance of maintenance of bicycles, skateboards, motorcycles, etc.)

2.3. identify need for personal safety and own injury prevention habits. (REQUIRED TOPICS: use of protective sports and play gear, seat belt use; use of medicines) (Overlap: SAP)

2.4. demonstrate the ability to locate resources from home, school and community that provide help for injured individuals (REQUIRED TOPICS: who should provide care; responding to an emergency; using 911)

3.1. identify responsible injury prevention and treatment behaviors (REQUIRED TOPICS: who should provide care; responding to an emergency; using 911)

3.2. identify need for personal safety and own injury prevention habits. (REQUIRED TOPICS: use of protective sports and play gear, seat belt use; use of medicines) (Overlap: SAP)

3.3. compare behaviors that are safe to those that are risky or harmful. (REQUIRED TOPICS: avoiding dangerous objects -- guns, knives, needles, injured animals; abiding by safety rules)

3.4. use strategies for preventing injuries. (REQUIRED TOPICS: use of bike helmets, seatbelts, avoiding dangerous items, places; abiding by safety rules e.g. bus)

3.5. develop injury prevention and management strategies for personal health. (REQUIRED TOPICS: reducing or eliminating the potential for injury in the home, school and play environment; fire safety; locking up dangerous substances and items in the home; infant/child issues)

4.1. explain how media influences thoughts, feelings and behaviors about injury prevention. (REQUIRED TOPICS: safety equipment use; violence as a means to resolve conflict and/or express feelings)

4.2. explain how media influences thoughts, feelings and behaviors about injury prevention. (REQUIRED TOPICS: safety equipment use; violence as a means to resolve conflict and/or express feelings)

5.1. demonstrate healthy ways to express needs, wants, and feelings. (REQUIRED TOPICS: conflict and communication in relationships with family members, friends) (Overlap: MH)

5.2. differentiate between negative and positive responses to conflict situations. (REQUIRED TOPICS: what is conflict; verbal and physical fighting; use of weapons to resolve conflict)

5.3. understand and demonstrate non-violent strategies to resolve conflicts.

6.1. apply a decision-making process to an injury prevention issue. (REQUIRED TOPICS: decision-making models, e.g. identifying/defining problem; alternative solution, predicting consequences, choosing course of action, evaluating outcome.)

6.2. explain when it is appropriate to ask for assistance in preventing or treating injuries, including abuse or assault.

6.3. predict outcomes of specific decisions.

7.1. discuss accurate information and express opinions about injury prevention issues.

7.2. describe a variety of methods that convey accurate information and ideas about preventing and treating injuries.

7.3. identify community agencies that advocate for prevention of injuries.

7.4. influence and support others in making choices about avoiding risks with potential for injuries. (REQUIRED TOPICS: peer support for prevention of injuries)

7.5. work cooperatively when advocating for injury prevention.

7.6. analyze information and express opinions about injury prevention issues.

7.7. identify community agencies that advocate for prevention of injuries.

7.8. influence and support others in making choices about avoiding risks with potential for injuries. (REQUIRED TOPICS: peer support for prevention of injuries)

7.9. work cooperatively when advocating for injury prevention.
1.1. explain the relationship between positive health behaviors and the prevention of injury and premature death. (REQUIRED TOPICS: concept of intentional and unintentional injuries; magnitude of the injury problem among various age groups; predictability of injuries)

1.4b. analyze how environment and personal safety are interrelated. (REQUIRED TOPICS: weather, electrocution, fire, poison, firearms and other weapons)

1.3. explain the effects of injuries on the body, and the significance of disabling injuries (REQUIRED TOPICS: various injuries - breaks, strains, sprains; head and spinal cord injury; weight-lifting injuries)

1.5. describe ways to reduce risks related to injuries among adolescents. (REQUIRED TOPICS: use of safety equipment; signs & symptoms of child abuse; dating abuse) Overlaps: MH, SFL

1.6. describe how appropriate treatment can prevent premature death and disability related to injuries. (REQUIRED TOPICS: when to seek medical care; basic first aid; treating seizures, hypothermia, heat stroke, heat exhaustion; Heimlich maneuver; basic CPR and AED awareness) Overlaps: PSL, ACP, SFL

2.1. analyze the validity of injury prevention and treatment information. (REQUIRED TOPICS: sources of information)

2.4. locate injury prevention and treatment products and services (REQUIRED TOPICS: sources of products and services)

2.5. compare the costs and validity of injury prevention and treatment products. (REQUIRED TOPICS: quality; consumerism)

2.6. describe situations requiring professional health services (REQUIRED TOPICS: reporting child abuse; when to call for medical help; traffic related injuries; falls resulting in head injury; substance use; burns; water/boating injuries; sports injuries; weapons; poison.)

2.7. explain roles played by different health providers in promoting safety and preventing injuries. (REQUIRED TOPICS: role of public safety officers/police; fire; EMT/rescue workers, etc.)

3.1. explain the importance of assuming responsibility for behaviors. (REQUIRED TOPICS: safety laws and rules for home, play areas, school; impact of injury on the family, the individual and society)

3.2. analyze personal risk taking behaviors which could lead to injury. (REQUIRED TOPICS: recreational, leisure, home, occupational)

3.3. distinguish between safe and risky behaviors. (REQUIRED TOPICS: identifying personal lifestyle and environmental risks; recreational risks; eliminating hazards)

3.4. use injury prevention strategies to improve or maintain personal and family health. (REQUIRED TOPICS: use of safety equipment - helmet, pads, reflective gear, railroad safety; influence of alcohol, drugs on behavior, reason & judgment) Overlaps: MH, SA, PSL

3.5 develop injury prevention and management strategies for personal, family and community health. (REQUIRED TOPIC: home safety programs; motor-vehicle safety; emergency preparedness; confronting a life-threatening situation; role of legislation, regulation and enforcement; environmental change - e.g. pool fencing, sidewalks; product modification; education)

4.1. describe the influence of cultural and family beliefs on injury prevention behaviors. (REQUIRED TOPICS: family and community injury prevention practices.)

4.2. analyze how positive and negative messages from media and other resources influence personal and unintentional injury prevention (REQUIRED TOPICS: role models using safety equipment TV & movie violence)

4.3. analyze the influence of technology on personal and family injury prevention behaviors (REQUIRED TOPICS: advances in the use of social media and safety equipment).

4.4. analyze how information from peers influences and affects health choices about preventing injuries.

4.2. Students will understand concepts related to health promotion and disease prevention as a foundation for a healthy life.

Students will demonstrate the ability to:

2.2. Students will demonstrate the ability to access valid health information and health-promoting products and services.

3.3. Students will demonstrate the ability to practice health-enhancing behaviors and reduce health risks.

4.4. Students will analyze the influence of culture, media, technology & other factors on health.

5.5. Students will demonstrate the ability to use interpersonal communication skills to enhance health.

Standard 2: Students will understand concepts related to health promotion and disease prevention as a foundation for a healthy life.
**HEALTH EDUCATION STANDARDS and INJURY PREVENTION INSTRUCTIONAL OUTCOMES**

**GRADES 9 - 10**

**Overall Instructional Goals**

Grades 9 - 10: Students will understand that injuries are not "accidents", but are predictable and preventable. It is important to understand the relationship between personal risk-taking and injuries and the relationship of individual behaviors and their impact on others. Students will also recognize, understand and abide by basic rules, regulations, procedures and courteses and deal with interpersonal conflict in constructive, effective and non-violent ways.

## HEALTH EDUCATION STANDARDS and INJURY PREVENTION INSTRUCTIONAL OUTCOMES
### GRADES 11 - 12

### Overall Instructional Goals
**Grades 11 - 12:** Students will understand that injuries are not “accidents”, but are predictable and preventable. It is important to understand the relationship between personal risk-taking and injuries and the relationship of individual behaviors and their impact on others. Students will also recognize, understand and abide by basic rules, regulations, procedures and courtesies and deal with interpersonal conflict in constructive, effective and non-violent ways.

### Standard 1:
**Concepts Related to Health Promotion and Disease Prevention as a Foundation for a Healthy Life.**

1.2. analyze the family, peers, community and environment influence public health. **(REQUIRED TOPICS: regulations and laws regarding public safety; magnitude of the injury problem among various age groups; predictability of injuries; interpretation of data relating to incidence and prevalence of various injuries)** Overlap: SFL

1.4. analyze how public health policies and government regulations influence individual and community health and safety.

1.3. analyze how the public influences the development of public health policy and government regulations regarding safety and injury prevention.

### Standard 2:
**Demonstrate the Ability to Access Valid Health Information and Health-Promoting Products and Services.**

2.1. evaluate situations requiring professional health services. **(REQUIRED TOPICS: reporting child abuse; when to call for medical help; traffic related injuries; falls resulting in head injury; substance use; burns; water/boating injuries; sports injuries; weapons; poison)** Overlaps: PSL, SFL

2.4. evaluate opportunities for career choices in the field of injury prevention and safety.

2.5. analyze the educational requirements, demands, rewards and benefits of a career in the field of public health; public safety, injury prevention and/or injury treatment.

### Standard 3:
**Demonstrate the Ability to Practice Health-Enhancing Behaviors and Reduce Health Risks.**

3.2. evaluate injury prevention and management strategies for personal, family, workplace and community health. **(REQUIRED TOPICS: home and occupational safety; correct performance of adult CPR and AED awareness, basic first aid for injury, heart attack and choking)**

### Standard 4:
**Analyze the Influence of Culture, Media, Technology & Other Factors on Health.**

4.1. research a school or community safety issue resulting from the influence of culture, media, technology or other factors. **(REQUIRED TOPICS: TV/movie violence; sexual assault; recreational safety; weapons; poison)**

4.5. evaluate the effectiveness of communication methods for accurately expressing safety and injury prevention issues. **(REQUIRED TOPICS: pro-social, communication and cooperation skills; dealing with diversity; resolving conflict)**

### Standard 5:
**Demonstrate the Ability to Use Interpersonal Communication Skills to Enhance Health.**

5.1. evaluate different strategies to use when making decision about resolving conflict and avoiding injury. **(REQUIRED TOPICS: impact of alcohol/drugs on judgment and decision-making; conflict resolution skills; avoiding violence; choices about safety precautions)**

### Standard 6:
**Demonstrate the Ability to Use Goal Setting & Decision Making Skills to Enhance Health.**

6.1. discuss accurate information and express opinions about injury prevention and safety.

### Standard 7:
**Demonstrate the Ability to Advocate for Personal, Family, Community & Environmental Health.**

7.1. discuss accurate information and express opinions about injury prevention and safety.

7.2. adapt injury prevention messages and techniques to the characteristics of a particular audience.

7.3. influence and support others in making positive choices regarding avoiding injury.

7.4. work cooperatively when advocating for injury prevention, including creating and maintaining a positive family, school and community environment.

7.5. evaluate community health services and systems addressing public safety and make recommendations for improving those systems and services.

**"REQUIRED TOPICS" indicates that the content listed is the minimum amount required under state regulations; when topics are not listed, the outcome(s) establish(ies) the minimum content for that standard.**

Overlap: The content area of INJURY PREVENTION lends itself to considerable overlap with other health content areas, namely: PERSONAL HEALTH (PSL), MENTAL AND EMOTIONAL HEALTH (MH), SEXUALITY AND FAMILY LIFE (SFL). Linkages with Social Studies, Science, Mathematics, English Language Arts, Family Life & Consumer Science are also possible.
4. NUTRITION
HEALTH EDUCATION STANDARDS and NUTRITION INSTRUCTIONAL OUTCOMES
GRADES K - 4

Overall Instructional Goal: Students will understand the relationship between proper nutrition and one's health, including physical and cognitive performance.

<td>Students will demonstrate the ability to practice health-enhancing behaviors and reduce health risks.</td>
</tr>
</tbody>
</table>

**STUDENTS WILL DEMONSTRATE THE ABILITY TO:**

1.1. describe relationships between proper nutrition and individual well being on a daily basis and throughout the life span. (REQUIRED TOPICS: food as fuel, sensory and functional characteristics of food, various needs throughout lifespan, variety and moderation.

1.2. identify indicators of good nutrition during childhood. (REQUIRED TOPICS: food pyramid, major nutrients, impact of proper nutrition on health and personal wellness)

1.3. describe how the body digests and uses food. (REQUIRED TOPICS: anatomy of digestive system, plant and animal sources of foods)

1.4. identify common childhood problems related to poor nutrition (REQUIRED TOPICS: dental health, energy levels, foods and non-foods)

1.5. explain how childhood injuries and illnesses related to food storage and preparation can be prevented or treated. (REQUIRED TOPICS: food storage, food sources, food chain, from farm to table, food preparation; food allergies)

1.6. identify characteristics of valid nutrition information and good nutrition promoting products and services. (REQUIRED TOPICS: identifying health helpers -- e.g. persons, books)

1.7. locate resources from home, school and community that provide valid health information about nutrition.

1.8. locate school and community nutrition helpers. (REQUIRED TOPICS: identifying health helpers)

1.9. compare cost and nutritional value of various foods.

1.10. identify situations requiring professional health services for nutrition. (REQUIRED TOPICS: e.g. special diets for diabetes, food safety)

1.11. identify different kinds of health providers who can provide information and services about nutrition (REQUIRED TOPICS: e.g. dentists, dental hygienists, physicians, nurses, FNPs, PAs, nutritionists, dietitians)

1.12. identify responsible nutrition behaviors. (REQUIRED TOPICS: importance of beginning healthy diet at young age)

1.13. identify personal nutritional needs and nutrition habits.

1.14. compare eating behaviors that are safe to those that are risky or harmful. (REQUIRED TOPICS: safe snack preparation; what things are edible)

1.15. demonstrate strategies to improve or maintain nutrition behaviors which enhance health. (REQUIRED TOPICS: dental health; exercise)

1.16. develop injury prevention and management strategies for personal health. (REQUIRED TOPICS: safe food preparation)

1.17. discuss the influence of culture upon nutrition behaviors, such as food choice and food preparation.

1.18. explain how media influences nutrition behaviors. (REQUIRED TOPICS: food guide pyramid and own eating patterns)

1.19. explain how media influences selection of foods, information about nutrition, food and nutrition products and services. (REQUIRED TOPICS: relationship of money and nutrition; advertisements and food selection)

1.20. describe ways technology influences nutrition.

1.21. explain how information from school, family and society influences nutrition.

1.22. use healthy ways to express nutritional wants, needs and feelings.

1.23. choose healthy foods in a social context.

1.24. apply decision-making process to a nutritional issue. (Overlap: MH)

1.25. explain when it is appropriate to ask for assistance in making a nutrition-related decision and setting healthy eating goals. (REQUIRED TOPICS: food guide pyramid and own eating patterns)

1.26. predict outcomes of specific nutrition decisions.

1.27. set a personal nutritional goal and track progress towards its achievement.

1.28. analyze nutrition behaviors and practices which enhance health.

1.29. apply a decision-making process to a nutritional issue. (Overlap: MH)

1.30. use accurate information and express opinions about nutrition issues.

1.31. describe a variety of methods that convey accurate information and ideas about nutrition.

1.32. identify community agencies that advocate for good nutrition.

1.33. influence and support others in making positive nutritional choices.

1.34. work cooperatively when advocating for good nutrition.
### HEALTH EDUCATION STANDARDS and NUTRITION EDUCATION INSTRUCTIONAL OUTCOMES

**GRADES 5 - 8**

**Overall Instructional Goal:** Students will understand the role of proper nutrition in the attainment and maintenance of health and the relationship between nutrition and physical and mental performance.

5. SEXUALITY AND FAMILY LIFE
HEALTH EDUCATION STANDARDS and SEXUALITY AND FAMILY LIFE INSTRUCTIONAL OUTCOMES

GRADES K - 4

Overall Instructional Goal: Students will comprehend basic concepts including roles and values of families, the beginning of life, and respect of self and others.

**STUDENTS WILL DEMONSTRATE THE ABILITY TO:**

1.3. describe the basic structure and functions of the body systems relating to reproduction. *(REQUIRED TOPICS: male and female reproductive anatomy (including correct terminology – e.g. breast, vulva, penis); basic plant and animal reproduction; puberty and its physical, mental and emotional changes; human fertilization which occurs through a process named intercourse; pregnancy)*

1.4. describe how physical, social, emotional, and family environments influence personal health. *(REQUIRED TOPICS: gender roles; personal choices regarding play, work, clothes, hobbies, sports, etc.; roles of families; roles of family members; differences found in human families - e.g. single parent, extended families; parenting issues and responsibilities; friendship; roles and responsibilities of friends; ways to show caring in families and in friendships)*

1.5. recognize that all people, including children have rights and a child is never at fault if someone touches him/her in a way that is wrong or uncomfortable.

1.6. differentiate between good and bad touch.

1.7. discriminate between people who care for you and people who may try to harm you. *(REQUIRED TOPICS: sexual abuse; people who care for you should not make you do something that may harm you; both boys and girls can be sexually abused)*

2.2. locate resources form home, school and community that provide valid health information about growth and development.

2.4. locate school and community health helpers *(REQUIRED TOPICS: why it is important for children to talk to trusted adults when they have questions or concerns about their bodies, growing up, or friends, and/or feelings)*

3.4. use strategies to improve or maintain personal health *(REQUIRED TOPICS: good health habits which can improve the way a person looks and feels. (e.g. diet, exercise, sleep)).*

3.6. identify and use ways to avoid and/or reduce threatening situations, including ways to deal with someone who is trying to harm a child or pressure them into doing something he or she does not want to do. *(REQUIRED TOPICS: resistance skills; sexual abuse prevention strategies, knowing how to say no to any unwanted touch, etc.)*

3.7. demonstrate specific sexual abuse prevention techniques including yelling at the person, leaving the situation, and/or telling a parent or a trusted adult who will listen. Overlaps: PSL, NUT, MII

4.1. discuss the influence culture has on family values, health behaviors, and practices.

4.2. describe how the media and other forms of technology (e.g. TV, movies, Internet, etc.) can influence a person’s thoughts, feelings, and behaviors about families and friends.

5.3. use appropriate forms of communication when expressing personal feelings.

6.1. explain how males and females have many different choices throughout their life span *(REQUIRED TOPICS: gender roles; personal choices regarding play, work, clothes, hobbies, sports, etc.)*

6.2. explain when it is appropriate to ask for assistance in making health related decisions *(REQUIRED TOPICS: role of parents, and trusted adults; why children need help from adults when making decisions)*

7.1. discuss accurate information and express opinions about health issues relating to growth and development. *(REQUIRED TOPICS: important for pregnant females to take care of their health during pregnancy; role of diet and exercise; prenatal care, effects of smoking, alcohol, and other drugs, role of proper rest etc.)*

7.4. influence and support others in making positive health choices. *(REQUIRED TOPICS: how families and friends can help pregnant females during pregnancy)*

7.4. influence or support others in making positive choices about feelings, friends and family.

7.2. explain why it is necessary to respect an individual’s rights and wishes concerning their body.

"REQUIRED TOPICS" indicates that the content listed is the minimum content required under state regulations; when topics are not listed, the outcome(s) establish(es) the minimum content for that standard.

Overlap: The content area of SEXUALITY AND FAMILY LIFE lends itself to considerable overlap with all the other health content areas. Linkages with Social Studies, Science, English Language Arts, Family Life and Consumer Science are also possible.

34
STUDENTS WILL DEMONSTRATE THE ABILITY TO:

1.2. describe the interrelationships of mental, emotional, social and physical health which males and females experience during puberty and adolescence. (REQUIRED TOPICS: how body image affects feelings and behaviors; feelings about body changes; role of heredity, environment and health habits in personal appearance; development of sexual and romantic feelings in many people during puberty; gender roles and gender role stereotyping; how talents, characteristics, strengths and hopes are equally found in boys and girls; sexual health including its enhancement of life and relationships; people as sexual beings with a sexual identity; definition of masturbation; definition of sexual orientation, gender identity/expression; theories which explain sexual orientation, gender identity/expression, coming out, homophobia; value of non-sexual relationships; characteristics of good friends; dating; types of dating; family views regarding dating; difference between like, love and romance.)

2.6. describe situations requiring professional services. (REQUIRED TOPICS: pregnancy, assistance with issues surrounding dating violence, rape, sexual abuse, etc.)

2.7. explain the role of health care providers (e.g., physicians, nurses, etc.) in puberty, maturing, contraceptive decision making and other reproductive health, sexuality and family life issues

2.7.1. identify trusted adults, professional health care providers, faith communities and other resources available for someone with questions about sexuality and growing up.

3.1. explain the importance of assuming responsibility for personal health behaviors related to puberty and reproductive health. (REQUIRED TOPICS: ways for males and females to maintain healthy habits during puberty; good health behaviors for a woman who is pregnant.)

3.2. analyze personal health habits to determine health strengths and risks. (REQUIRED TOPICS: ways people can be proud of their special qualities; impact of body image on emotions and behaviors; assuming responsibility for personal behaviors, including sexual behaviors.)

CONTINUED

3.1. describe the influence of different cultural and religious beliefs in the US on health behaviors and practices. (REQUIRED TOPICS: marriage, divorce, relationships, parenthood; factors which have significantly influenced family patterns through time; health behaviors and utilization of health services regarding sexual and reproductive health; use of contraception; prenatal care)

4.2. analyze why individuals need to examine positive and negative messages received from media, culture and peers. (REQUIRED TOPICS: decision-making about sexual health; peer influence on health choices; establishing guidelines for one's own sexual behavior; influence of media, peers and community on one's understanding of healthy relationships; similarities and differences in male and female gender roles; masculinity, femininity, choices and opportunities for males and females; unrealistic or negative images presented in gender role stereotyping.)

5.1. use effective verbal and non-verbal communication skills to enhance health. (REQUIRED TOPICS: Explains that personal choices of expression should be respected for all individuals; ways for pre-teens and teens to talk with their parents, other trusted adults and significant others about questions or concerns regarding sexual issues.)

5.2. describe how the behavior of family and peers affects interpersonal communication.

5.3. use healthy ways to express needs, wants and feelings.

5.4. communicate care, consideration and respect of self and others. (REQUIRED TOPICS: importance of respecting different value systems in friends and families; respect of others regardless of personal choice of expression)

5.5. use communication skills for dealing with sexual pressure from peers and from one's girlfriend/boyfriend (REQUIRED TOPICS: pressure to date and/or be sexually active; saying no and communicating limits, etc.)

6.1. apply different strategies when making decisions regarding puberty and sexual health. (REQUIRED TOPICS: Discuss the influence of sexual intercourse; responsible contraceptive use; steps involved in sexual decision-making; role of parents and trusted adults.)

6.2. analyze how decisions relating to puberty and sexual health are influenced by individuals, family and/or community values. (REQUIRED TOPICS: how parents and other trusted adults can help children with decisions regarding puberty and their personal health; role of self-esteem personal goals, family values in responsible sexual decision-making; responsibilities in family change as individuals mature, changes in family structure and influence on relationships.)

7.1. discuss accurate information about sexual health issues. (REQUIRED TOPICS: heterosexual, homosexual, and bisexual people are alike except for their sexual attraction; immediate and long-term impacts of adolescent pregnancy on the individual, family and community.)

7.4. to influence and support others in making positive personal health choices about family issues, relationships, sexualities, and growing up. (REQUIRED TOPICS: how people and communities can help homosexual and bisexual people who are often mistreated, called hurtful names, or denied their rights because of their sexual orientation, gender identity/expression)
**Overall Instructional Goal.** To develop an understanding of the emotional and physical issues related to families, the beginning of life, birth, friendship, puberty, adolescence and growing up.

<table>
<thead>
<tr>
<th>Grades 5-8</th>
<th>Standard 1: Students will understand concepts related to health promotion and disease prevention as a foundation for a healthy life.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students will demonstrate the ability to:</td>
<td>1.4. describe how family, peers and environment influence the health of adolescents. (REQUIRED TOPICS: families in present-day society; patterns in US; separation, divorce and how children deal with their feelings about it; responsibilities and privileges inherent in family; responsible parenting; seriousness and long-term nature of having and/or raising a child; why some people choose not to have children.)</td>
</tr>
<tr>
<td></td>
<td>1.5. describes ways to reduce risks related to sexual health (REQUIRED TOPICS: abstinence from sexual intercourse as the acceptable form of sexual expression for pre-teenagers and adolescents; need for adolescents to set limits regarding sexual expression.)</td>
</tr>
<tr>
<td></td>
<td>1.6. explain how appropriate health care can enhance health (REQUIRED TOPICS: contraception as a means to prevent pregnancy; methods; advantages and disadvantages, etc.; choices when a woman is faced with an unintended pregnancy - e.g. raise the child, adoption, abortion; the crime of rape as forced intimate sexual conduct)</td>

<td>7.1. demonstrate the ability to analyze how the environment influences their health.</td>
</tr>
</tbody>
</table>

*Required Topics* indicates that the content listed is the minimum content required under state regulations; when topics are not listed, the outcome(s) establish(s) the minimum content for that standard.

Overlap: The content area of SEXUALITY AND FAMILY LIFE lends itself to considerable overlap with all the other health content areas. Linkages with Social Studies, Science, English Language Arts, Family Life and Consumer Science are also possible.
**HEALTH EDUCATION STANDARDS and SEXUALITY AND FAMILY LIFE INSTRUCTIONAL OUTCOMES**

**GRADES 9-10**

**Overall Instructional Goal:** Students will gain an understanding of those elements inherent in healthy sexual development and maturation including: family communication, relationships, sexual identity, human sexual response cycle, and sexual decision-making.

**STUDENTS WILL DEMONSTRATE THE ABILITY TO:**

1. Analyze how behavior can impact reproductive health and maintain sexual identity.
   - **REQUIRED TOPICS:** need for contraception during intercourse unless pregnancy is planned; advantages and disadvantages of various methods of contraception; fetal development; childbirth; role of mother, father, coach during labor and delivery; definition of legal abortion

2. Describe the interrelationships of mental, emotional, social and physical health throughout young adulthood.
   - **REQUIRED TOPICS:** function of sexual and reproductive anatomy; facts vs. myths; human sexual response cycle; sexual feelings and desires throughout lifetime; role of hormones in growth and development and reproductive and sexual functioning; people with disabilities have sexual feelings, desires; dating readiness and interest varies among individuals; sexual expression as an important component of individual's sexual identity; homosexuality, heterosexuality, bisexuality and implications for sexual health, sexual activity, gender roles, etc.

3. Assess the impact of adolescent sexual health behaviors on the individual, family, the community and society.
   - **REQUIRED TOPICS:** adolescent pregnancy; STDs; sexual harassment and sexual assault, relationship between sexual behaviors and violence.

4. Assess how the family, peers, community, and environment influence the health of individuals.
   - **REQUIRED TOPICS:** various reasons people date, including love, is a matter of choice and should not be compromised; feelings; types of families; factors having an adverse effect on feelings and reality; feelings about family structure; family and community; gay/lesbian community resources.

5. Access and use community resources for self and others.
   - **REQUIRED TOPICS:** adolescents with an unplanned pregnancy should talk with their parents, religious leaders, health care providers, and/or other trusted adults.

6. Assess the situation requiring professional services for teens.
   - **REQUIRED TOPICS:** using health professionals (e.g. gynecologist, obstetrician, urologist, community health agencies, etc.); dealing with sexual harassment/assault.

7. Analyze the role of cultural diversity on healthy behavior and challenge health behaviors.
   - **REQUIRED TOPICS:** cultural values and behavior and health; role of religion, cultural and family and societal values.

8. Evaluate the effect of media and other factors on relationships, sexuality, and other aspects of personal and community health.
   - **REQUIRED TOPICS:** media portrayal of sexuality; realistic and unrealistic images of adolescents and adults; relationships; role of emotions, peers, gender roles, culture, personal choice, etc. on motivations for sexual activity.

9. Analyze how mental, emotional and physical health affect other health behaviors.
   - **REQUIRED TOPICS:** mental health, emotional health, physical health and the role of each.

10. Assess the individual's sexual response cycle; sexual feelings and desires, and body changes.
    - **REQUIRED TOPICS:** physical and psychological aspects of sexual health and sexual response cycle; sexual feelings and desires, and body changes.

11. Assess the individual's sexual identity; expression of feelings, role of significant others, coming out, relationships, family life issues.
    - **REQUIRED TOPICS:** attitudes, beliefs, values; goal setting and decision-making skills; recognizing appropriate and inappropriate behavior.

    - **REQUIRED TOPICS:** reproductive health; family planning; sex education; family planning; childbearing.

13. Make informed decisions about health behaviors.
    - **REQUIRED TOPICS:** role of promoters and barriers; role of professionals; role of self; role of family, community, and others.

14. Demonstrate skills for interpersonal communication.
    - **REQUIRED TOPICS:** assertive in sexual situations; effective communication techniques; individuals' right to say no if they are uncomfortable; being non-intimidating.

15. Use strategies that solve interpersonal conflicts without harming self or others.
    - **REQUIRED TOPICS:** using assertiveness and conflict resolution techniques; personal, family and community.

16. Use strategies that enhance relationships and avoid potentially harmful situations.
    - **REQUIRED TOPICS:** assertion and collaboration skills; refusal techniques; managing expectations.

17. Use strategies that improve or maintain sexual health.
    - **REQUIRED TOPICS:** importance for adolescents and adults to maintain sexual health.

18. Use multiple strategies when making decisions related to sexuality and family life issues.
    - **REQUIRED TOPICS:** decision making, goal setting and decision-making skills.

19. Use strategies that enhance relationships and avoid potentially harmful situations.
    - **REQUIRED TOPICS:** assertion and collaboration skills; refusal techniques; managing expectations.

20. Use strategies that improve or maintain sexual health.
    - **REQUIRED TOPICS:** importance for adolescents and adults to maintain sexual health.

21. Use strategies that solve interpersonal conflicts without harming self or others.
    - **REQUIRED TOPICS:** using assertiveness and conflict resolution techniques; personal, family and community.

22. Use strategies that enhance relationships and avoid potentially harmful situations.
    - **REQUIRED TOPICS:** assertion and collaboration skills; refusal techniques; managing expectations.

23. Use strategies that improve or maintain sexual health.
    - **REQUIRED TOPICS:** importance for adolescents and adults to maintain sexual health.

24. Use strategies that solve interpersonal conflicts without harming self or others.
    - **REQUIRED TOPICS:** using assertiveness and conflict resolution techniques; personal, family and community.

25. Use strategies that enhance relationships and avoid potentially harmful situations.
    - **REQUIRED TOPICS:** assertion and collaboration skills; refusal techniques; managing expectations.

26. Use strategies that improve or maintain sexual health.
    - **REQUIRED TOPICS:** importance for adolescents and adults to maintain sexual health.

27. Use strategies that solve interpersonal conflicts without harming self or others.
    - **REQUIRED TOPICS:** using assertiveness and conflict resolution techniques; personal, family and community.

28. Use strategies that enhance relationships and avoid potentially harmful situations.
    - **REQUIRED TOPICS:** assertion and collaboration skills; refusal techniques; managing expectations.

29. Use strategies that improve or maintain sexual health.
    - **REQUIRED TOPICS:** importance for adolescents and adults to maintain sexual health.

30. Use strategies that solve interpersonal conflicts without harming self or others.
    - **REQUIRED TOPICS:** using assertiveness and conflict resolution techniques; personal, family and community.

31. Use strategies that enhance relationships and avoid potentially harmful situations.
    - **REQUIRED TOPICS:** assertion and collaboration skills; refusal techniques; managing expectations.

32. Use strategies that improve or maintain sexual health.
    - **REQUIRED TOPICS:** importance for adolescents and adults to maintain sexual health.

33. Use strategies that solve interpersonal conflicts without harming self or others.
    - **REQUIRED TOPICS:** using assertiveness and conflict resolution techniques; personal, family and community.

34. Use strategies that enhance relationships and avoid potentially harmful situations.
    - **REQUIRED TOPICS:** assertion and collaboration skills; refusal techniques; managing expectations.

35. Use strategies that improve or maintain sexual health.
    - **REQUIRED TOPICS:** importance for adolescents and adults to maintain sexual health.

36. Use strategies that solve interpersonal conflicts without harming self or others.
    - **REQUIRED TOPICS:** using assertiveness and conflict resolution techniques; personal, family and community.

37. Use strategies that enhance relationships and avoid potentially harmful situations.
    - **REQUIRED TOPICS:** assertion and collaboration skills; refusal techniques; managing expectations.

38. Use strategies that improve or maintain sexual health.
    - **REQUIRED TOPICS:** importance for adolescents and adults to maintain sexual health.

39. Use strategies that solve interpersonal conflicts without harming self or others.
    - **REQUIRED TOPICS:** using assertiveness and conflict resolution techniques; personal, family and community.

40. Use strategies that enhance relationships and avoid potentially harmful situations.
    - **REQUIRED TOPICS:** assertion and collaboration skills; refusal techniques; managing expectations.

41. Use strategies that improve or maintain sexual health.
    - **REQUIRED TOPICS:** importance for adolescents and adults to maintain sexual health.

42. Use strategies that solve interpersonal conflicts without harming self or others.
    - **REQUIRED TOPICS:** using assertiveness and conflict resolution techniques; personal, family and community.

43. Use strategies that enhance relationships and avoid potentially harmful situations.
    - **REQUIRED TOPICS:** assertion and collaboration skills; refusal techniques; managing expectations.

44. Use strategies that improve or maintain sexual health.
    - **REQUIRED TOPICS:** importance for adolescents and adults to maintain sexual health.

45. Use strategies that solve interpersonal conflicts without harming self or others.
    - **REQUIRED TOPICS:** using assertiveness and conflict resolution techniques; personal, family and community.

46. Use strategies that enhance relationships and avoid potentially harmful situations.
    - **REQUIRED TOPICS:** assertion and collaboration skills; refusal techniques; managing expectations.

47. Use strategies that improve or maintain sexual health.
    - **REQUIRED TOPICS:** importance for adolescents and adults to maintain sexual health.

48. Use strategies that solve interpersonal conflicts without harming self or others.
    - **REQUIRED TOPICS:** using assertiveness and conflict resolution techniques; personal, family and community.

49. Use strategies that enhance relationships and avoid potentially harmful situations.
    - **REQUIRED TOPICS:** assertion and collaboration skills; refusal techniques; managing expectations.

50. Use strategies that improve or maintain sexual health.
    - **REQUIRED TOPICS:** importance for adolescents and adults to maintain sexual health.
Overall Instructional Goal: Students will gain an understanding of the importance of human sexuality and that healthy sexuality throughout one's life is dependent on respect and understanding of self, families, sexual growth and development, sexual identity and interpersonal relationships.

**Grades 11-12**

**Standard 1:** Students will understand concepts related to health promotion and disease prevention as a foundation for a healthy life.

**Standard 2:** Students will demonstrate the ability to access valid health information and health-promoting products and services.

**Standard 3:** Students will demonstrate the ability to practice health-enhancing behaviors and reduce health risks.

**Standard 4:** Students will analyze the influence of culture, media, technology and other factors on health.

**Standard 5:** Students will demonstrate the ability to use interpersonal communication skills to enhance health.

**Standard 6:** Students will demonstrate the ability to communicate for personal, family, community and environmental health.

**STUDENTS WILL DEMONSTRATE THE ABILITY TO:**

1. analyze the interrelationships of mental, emotional, social and physical health throughout life. (REQUIRED TOPICS: implications of human sexuality with biological, social, psychological, ethical and cultural dimensions; human sexuality throughout the lifespan; committed relationships vs. "falling in love"; dating as a way for some people to learn about others and relationships; statistics on teen pregnancy and parenting; marriage and lifetime commitments; relationship choices; value of communication, choices, trust and friendships in a relationship; mutual support for continued development as individuals in a relationship; influence of social and cultural environments on the way individuals learn about and express their sexuality; gays and lesbians can establish fulfilling committed relationships)

1.3. describe how to delay onset and reduce risks of reproductive health problems. (REQUIRED TOPICS: importance of preventive health behaviors including regular check-ups, breast and testicular self-exams, prevention of unwanted pregnancy and sexually transmitted diseases)

1.4. analyze the relationship between public health policies, government regulations, health promotion and disease prevention. (REQUIRED TOPICS: issues such as abortion/contraception; definition of abortion as a medical intervention which terminates pregnancy and not a method of contraception; issues involved in choosing a method of contraception including advantages, disadvantages; motivation, cost, effectiveness, comfort, religious beliefs, parent/family values; prevention of STDs, HIV transmission; laws regarding consent/sexual assault)

2.1. evaluate resources from home, school and community that provide information about sexual health and sexuality and family life information for self and others.

2.2. evaluate factors which influence personal selection of health products and services.

2.3. evaluate situations requiring professional services and identify appropriate services. (REQUIRED TOPICS: identification of various professional services for human sexuality and family life issues; STDs; sexual decision-making; sexual dysfunction; sexual harassment or assault; victimization; sexual orientation, gender identity/expression; teen pregnancy and parenting; family crises; marriage/partner relationship difficulties)

3.1. evaluate the effect of sexual behaviors on self, others and the community. (REQUIRED TOPICS: impact of adolescent alcohol/drug use combined with sexual activity including assault; date rape; STDs, pregnancy, fetal and infant problems or mortality; importance of caring for one's reproductive health to assure health of future offspring; behaviors for perinatal (before, during, after pregnancy) health; factors and skills contributing to positive, consistent parenting; impact of sexual abuse on an individual including sexual abuse, rape, and date rape)

3.3. design a plan with recommended strategies for individuals, schools, and communities to reduce the incidence of sexual abuse, rape, and sexual harassment.

3.3.1. identify strategies which can aid in the prevention of unplanned pregnancy. (REQUIRED TOPICS: role of education, sexual decision-making, positive self-esteem, etc.)

4.1. research a school or community sexuality or family life issue resulting from the interaction of media, technology and other factors. (REQUIRED TOPICS: influence on thoughts; Feelings, behaviors related to human sexuality; how relationships are different than those modeled or taught in the media; relationship of personal and family values regarding sexuality; American society's diversity of sexual attitudes and behaviors; discrimination related to sexual orientation, gender identity/expression; various cultural beliefs and practices regarding sexuality; committed relationships; role of culture on person's decisions regarding sexual relationships and other human sexuality issues; how faith communities address various current human sexuality issues)

4.2. research how media, culture and technology influence thoughts and behaviors regarding human sexuality issues. (REQUIRED TOPICS: role of education, sexual decision-making, positive self-esteem, etc.)

4.2.1. analyze the influence of various communication methods for a range of media, technology and other factors. (REQUIRED TOPICS: influence on thoughts; Feelings, behaviors related to human sexuality; how relationships are different than those modeled or taught in the media; relationship of personal and family values regarding sexuality; American society's diversity of sexual attitudes and behaviors; discrimination related to sexual orientation, gender identity/expression; various cultural beliefs and practices regarding sexuality; committed relationships; role of culture on person's decisions regarding sexual relationships and other human sexuality issues; how faith communities address various current human sexuality issues)

5.1. evaluate the effectiveness of various communication methods for a range of media, technology and other factors. (REQUIRED TOPICS: influence on thoughts; Feelings, behaviors related to human sexuality; how relationships are different than those modeled or taught in the media; relationship of personal and family values regarding sexuality; American society's diversity of sexual attitudes and behaviors; discrimination related to sexual orientation, gender identity/expression; various cultural beliefs and practices regarding sexuality; committed relationships; role of culture on person's decisions regarding sexual relationships and other human sexuality issues; how faith communities address various current human sexuality issues; constructive ways of dealing with sexual harassment)

5.1.1. evaluate different strategies to use when making decisions related to sexual health, family life and potential risks of young adults.

6.1. discuss accurate information and express opinions about human sexuality and family life issues. (REQUIRED TOPICS: responsibility of adults and adolescents to help younger children avoid or deal effectively with negative influences (e.g. in the media) surrounding human sexuality; supporting others' positive choices about dating relationships; how one can be a support system to gay and lesbian individuals when they decide to "come out"

7.1. discuss accurate information and express opinions about human sexuality and family life issues. (REQUIRED TOPICS: responsibility of adults and adolescents to help younger children avoid or deal effectively with negative influences (e.g. in the media) surrounding human sexuality; supporting others' positive choices about dating relationships; how one can be a support system to gay and lesbian individuals when they decide to "come out"

7.2. discuss accurate information and express opinions about human sexuality and family life issues. (REQUIRED TOPICS: responsibility of adults and adolescents to help younger children avoid or deal effectively with negative influences (e.g. in the media) surrounding human sexuality; supporting others' positive choices about dating relationships; how one can be a support system to gay and lesbian individuals when they decide to "come out"

7.3. discuss accurate information and express opinions about human sexuality and family life issues. (REQUIRED TOPICS: responsibility of adults and adolescents to help younger children avoid or deal effectively with negative influences (e.g. in the media) surrounding human sexuality; supporting others' positive choices about dating relationships; how one can be a support system to gay and lesbian individuals when they decide to "come out"

7.4. work cooperatively when advocating for healthy sexuality and advocating for rights of individuals with HIV/AIDS. (REQUIRED TOPICS: proposing solutions to reduce the incidence of homophobic acts such as discrimination and violence against homosexuals and bisexual people because of their sexual orientation, gender identity/expression; understanding the impact of rape on the victim, the victim's family and society; long-term effects; portrayals of rapists, reporting, investigation, trial, etc.)

7.5. evaluate community health services and systems currently in place and make recommendations for improving those systems and services with regard to sexual health and family life.
6. DISEASE PREVENTION AND CONTROL
## HEALTH EDUCATION STANDARDS and DISEASE CONTROL and PREVENTION INSTRUCTIONAL OUTCOMES

### GRADES K - 4

**Overall Instructional Goal:** Students will recognize factors which contribute to disease and illness, their effect on the individual and society and how to prevent the transmission of communicable disease and the development of chronic disease.

### STUDENTS WILL DEMONSTRATE THE ABILITY TO:

1. **Communicable Disease:**
   - **Topical Overlap:** PSL, NUT, INJ
   - **Topical:** Communicable Disease (PSL), MENTAL AND EMOTIONAL HEALTH (MH) and SEXUALITY AND FAMILY LIFE (SFL).
   - **Topical:** Infections can spread through the body; disease causing agents; factors which contribute to disease and infection; difference between communicable and non-communicable disease; how diseases and disorders affect feelings and actions.
   - **Topical:** Be able to distinguish among illness, disease and health; the relationship between positive feelings of self and taking care of one's body; disease causing agents; factors which contribute to disease and infection; difference between communicable and non-communicable disease; how diseases and disorders affect feelings and actions. (Required topics)

2. **Environmental:**
   - **Environmental Overlap:** PSL, NUT
   - **Environmental:** Ultimate care of one's environment.
   - **Environmental:** Be able to describe relationships between personal health behaviors and individual well-being. (Required topics)

3. **Cardiovascular System:**
   - **Cardiovascular System Overlap:** PSL, SAP
   - **Cardiovascular System:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

4. **Immunology:**
   - **Immunology Overlap:** PSL, SAP
   - **Immunology:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

5. **Health Literacy:**
   - **Health Literacy Overlap:** PSL, SAP
   - **Health Literacy:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

6. **Sneezing:**
   - **Sneezing Overlap:** PSL, SAP
   - **Sneezing:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

7. **Avoiding Contact:**
   - **Avoiding Contact Overlap:** PSL, SAP
   - **Avoiding Contact:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

8. **Understanding Heredity:**
   - **Understanding Heredity Overlap:** PSL, SAP
   - **Understanding Heredity:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

9. **Avoiding Cigarette Smoking:**
   - **Avoiding Cigarette Smoking Overlap:** PSL, SAP
   - **Avoiding Cigarette Smoking:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

10. **Avoiding Contact with Others’ Blood:**
    - **Avoiding Contact with Others’ Blood Overlap:** PSL, SAP
    - **Avoiding Contact with Others’ Blood:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

11. **Avoiding Contact with Others’ Body Fluids:**
    - **Avoiding Contact with Others’ Body Fluids Overlap:** PSL, SAP
    - **Avoiding Contact with Others’ Body Fluids:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

12. **Exposure to Others:**
    - **Exposure to Others Overlap:** PSL, SAP
    - **Exposure to Others:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

13. **Transmission of Disease:**
    - **Transmission of Disease Overlap:** PSL, SAP
    - **Transmission of Disease:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

14. **Transmission of Disease:**
    - **Transmission of Disease Overlap:** PSL, SAP
    - **Transmission of Disease:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

15. **Transmission of Disease:**
    - **Transmission of Disease Overlap:** PSL, SAP
    - **Transmission of Disease:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

16. **Transmission of Disease:**
    - **Transmission of Disease Overlap:** PSL, SAP
    - **Transmission of Disease:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

17. **Transmission of Disease:**
    - **Transmission of Disease Overlap:** PSL, SAP
    - **Transmission of Disease:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

18. **Transmission of Disease:**
    - **Transmission of Disease Overlap:** PSL, SAP
    - **Transmission of Disease:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

19. **Transmission of Disease:**
    - **Transmission of Disease Overlap:** PSL, SAP
    - **Transmission of Disease:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

20. **Transmission of Disease:**
    - **Transmission of Disease Overlap:** PSL, SAP
    - **Transmission of Disease:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

21. **Transmission of Disease:**
    - **Transmission of Disease Overlap:** PSL, SAP
    - **Transmission of Disease:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

22. **Transmission of Disease:**
    - **Transmission of Disease Overlap:** PSL, SAP
    - **Transmission of Disease:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

23. **Transmission of Disease:**
    - **Transmission of Disease Overlap:** PSL, SAP
    - **Transmission of Disease:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

24. **Transmission of Disease:**
    - **Transmission of Disease Overlap:** PSL, SAP
    - **Transmission of Disease:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

25. **Transmission of Disease:**
    - **Transmission of Disease Overlap:** PSL, SAP
    - **Transmission of Disease:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

26. **Transmission of Disease:**
    - **Transmission of Disease Overlap:** PSL, SAP
    - **Transmission of Disease:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

27. **Transmission of Disease:**
    - **Transmission of Disease Overlap:** PSL, SAP
    - **Transmission of Disease:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

28. **Transmission of Disease:**
    - **Transmission of Disease Overlap:** PSL, SAP
    - **Transmission of Disease:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

29. **Transmission of Disease:**
    - **Transmission of Disease Overlap:** PSL, SAP
    - **Transmission of Disease:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

30. **Transmission of Disease:**
    - **Transmission of Disease Overlap:** PSL, SAP
    - **Transmission of Disease:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

31. **Transmission of Disease:**
    - **Transmission of Disease Overlap:** PSL, SAP
    - **Transmission of Disease:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

32. **Transmission of Disease:**
    - **Transmission of Disease Overlap:** PSL, SAP
    - **Transmission of Disease:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

33. **Transmission of Disease:**
    - **Transmission of Disease Overlap:** PSL, SAP
    - **Transmission of Disease:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

34. **Transmission of Disease:**
    - **Transmission of Disease Overlap:** PSL, SAP
    - **Transmission of Disease:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

35. **Transmission of Disease:**
    - **Transmission of Disease Overlap:** PSL, SAP
    - **Transmission of Disease:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

36. **Transmission of Disease:**
    - **Transmission of Disease Overlap:** PSL, SAP
    - **Transmission of Disease:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

37. **Transmission of Disease:**
    - **Transmission of Disease Overlap:** PSL, SAP
    - **Transmission of Disease:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

38. **Transmission of Disease:**
    - **Transmission of Disease Overlap:** PSL, SAP
    - **Transmission of Disease:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

39. **Transmission of Disease:**
    - **Transmission of Disease Overlap:** PSL, SAP
    - **Transmission of Disease:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)

40. **Transmission of Disease:**
    - **Transmission of Disease Overlap:** PSL, SAP
    - **Transmission of Disease:** Be able to describe the basic structure and functions of the body systems responsible for fighting illness. (Required topics)
Overall Instructional Goal: Students will recognize factors which contribute to disease and illness, their effect on the individual and society and how to prevent the transmission of communicable disease and the development of chronic disease.

Students Will Demonstrate the Ability To:

1.4. describe how physical, social emotional and family environments contribute to disease and illness.

(Required Topics: health habits in the home, e.g. hand washing; food preparation and storage; universal precautions; hygiene; lifestyle practice; environment; how individuals and families can protect the environment; how unsafe/hazardous environmental conditions, such as chemical dumping, lead) Overlaps: PSL, NUT, INJ

1.5. identify common health problems of children. (Required Topics: Communicable Diseases - childhood diseases such as colds, flu, chicken pox; HIV as a virus passed from one person to another; how HIV is not transmitted, e.g. sharing cups; AIDS as a very serious disease, rarely contracted by young children; why children can play and be with other children and family members who have HIV/AIDS. Non-Communicable Diseases – Birth defects; nutrition deficiencies; injuries)

1.6. identify diseases that should be detected and treated early.

(Required Topics: identifying symptoms) Overlaps: INJ, SFL, PSL

1.7. explain how childhood illness can be prevented or treated. (Required Topics: measures to prevent transmission to others; safety measures at home, school and play environments.) Overlaps: PSL, COM, INJ

Required Topics indicate that the content listed is the minimum amount required under state regulations; when topics are not listed, the outcome(s) establish(es) the minimum content for that standard.

Overlap: The content area of Disease Control and Prevention lends itself to considerable overlap with other content areas, namely: Personal Health (PSL), Mental and Emotional Health (MH) and Sexuality and Family Life (SFL). Linkages with Social Studies, Science, Mathematics, English Language Arts, Family Life and Consumer Science are also possible.
HEALTH EDUCATION STANDARDS for DISEASE CONTROL and PREVENTION INSTRUCTIONAL OUTCOMES

**GRADES 5 - 8**

**Overall Instructional Goal:** Students will recognize factors which contribute to disease and illness, their effect on the individual and society, how to prevent the transmission of communicable disease and the development of chronic disease.

<tr>
<td>Standard 7: Students will demonstrate the ability to advocate for personal, family, community and environmental health.</td>
<td></td>
</tr>
</tbody>
</table>

**STUDENTS WILL DEMONSTRATE THE ABILITY TO:**

1.1 describe relationships between personal health behaviors and individual well-being. ((REQUIRED TOPICS: distinguish among illness, disease and health; relationship between positive feelings of self and taking care of one’s body; disease causing agents; factors which contribute to disease and infection; difference between communicable and non-communicable disease; how diseases and disorders affect feelings and actions.))

**Communicable diseases:** (REQUIRED TOPICS: definition of HIV/AIDS, sexually transmitted diseases (STD)/sexually transmitted infections (STI) signs, symptoms, incubation periods, disease agents, transmission and health risks; testing and treatment options; specific STD/STI — gonorrhea, chlamydia, genital warts/condyloma); other communicable diseases (e.g. TB, hepatitis, influenza, meningitis).

**Non-communicable diseases:** (REQUIRED TOPICS: cardiovascular disease (heart attack, stroke, high blood pressure, hypertension); risk factors related to heart disease; effects of cigarette smoking on body systems; cancer; stress and its relationship to heart disease, ulcers, and other disorders; physically challenged individuals.)

1.2 discuss the interrelationship of mental, emotional, social and physical health during adolescence. (REQUIRED TOPICS: positive health habits; effects of heredity on health status; short- and long-term effects of disease.)

CONTINUED

| | 2.1 analyze the validity of disease control and prevention information, services and products. (REQUIRED TOPICS: information for adolescents, including community agencies addressing HIV/AIDS issues and sources of information about the environment) |
| | 2.2 Access resources from home, school and community that provide validated information about disease prevention and control (REQUIRED TOPICS: resources for physically challenged individuals and their families; medical sites for diagnosis, treatment and information regarding STDs, HIV and AIDS), agencies and organizations which work to protect the environment) |
| | 2.6 describe situations requiring professional health services (REQUIRED TOPICS: when to seek help for illness; identify testing procedures for STDs; diagnosis of HIV through testing procedures, e.g. ELISA test, Western Blot test; basic treatments available for people with HIV and AIDS, e.g. medications, lifestyle changes, dealing with hazardous materials, e.g. chemicals, broken glass or metals, asbestos or other potentially harmful situations) |
| | 3.3 distinguish between safe and risky or harmful behaviors. (REQUIRED TOPICS: avoiding needle sharing, body piercing; steroid use; universal precautions; use of latex barriers, i.e. condoms, to help prevent HIV, STD transmission.) |
| | 3.5 apply disease prevention strategies to improve or maintain personal and family health. (REQUIRED TOPICS: basic hygiene practices; abstinence from sexual intercourse as one way to prevent exposure to HIV) |
| | 4.1 describe the influence of cultural beliefs on health behaviors. (REQUIRED TOPICS: stereotyping groups and illnesses such as country of origin, socioeconomic status, sexual orientation) |
| | 4.2 analyze how positive and negative messages from media and other sources influence behaviors which facilitate the transmission of disease. (REQUIRED TOPICS: mixed messages received by adolescents regarding sexual behaviors) Overlap: SFL |
| | 4.4 analyze how information from peers and other sources affects choices about engaging in behaviors which can transmit disease. Overlaps: SFL |
| | 4.7 use effective verbal and non-verbal communication skills to prevent transmission of disease. (REQUIRED TOPICS: listening skills; assertiveness; “I” statements; setting limits) |
| | 5.2 identify situations requiring professional health services (REQUIRED TOPICS: when to seek help for illness; identify testing procedures for STDs; diagnosis of HIV through testing procedures, e.g. ELISA test, Western Blot test; basic treatments available for people with HIV and AIDS, e.g. medications, lifestyle changes, dealing with hazardous materials, e.g. chemicals, broken glass or metals, asbestos or other potentially harmful situations) |
| | 6.2 apply refusal and negotiation skills needed to prevent disease transmission. (REQUIRED TOPICS: high risk behaviors leading to disease transmission, such as sexual activity, drug use, needle sharing, etc.) Overlaps: SFL, SAP, INJ |
| | 6.3 predict how decisions regarding exposure to diseases and lifestyle have consequences for self and others. (REQUIRED TOPICS: impact of STD/STI; development of heart disease, cancer or long term disability resulting from injury; laws regarding toxic waste disposal, littering, community recycling programs.) Overlaps: SFL, INJ, SFL |
| | 6.4 apply strategies and skills needed to attain personal health goals. (REQUIRED TOPICS: personal heart disease risk reduction plan; appropriate courses of action when disease is suspected.) |

42
# HEALTH EDUCATION STANDARDS for DISEASE CONTROL and PREVENTION INSTRUCTIONAL OUTCOMES

**GRADES 5 – 8 (Continued)**

**Overall Instructional Goal:** Students will recognize factors which contribute to disease and illness, their effect on the individual and society, how to prevent the transmission of communicable disease and the development of chronic disease.

<tr>
<td><strong>STUDENTS WILL DEMONSTRATE THE ABILITY TO:</strong></td>
<td>1. analyze how behavior can impact disease prevention.</td>
<td>Communicable: (REQUIRED TOPICS: transmission of STDS; use of ATOD use on risk-taking behavior.) Non-Communicable: risk factors associated with heart disease; relationship of lifestyle with cardiac disease and stroke; cancer; exposure to environmental hazards, etc. smoking, environmental tobacco smoke, industrial substances, occupational hazards) Overlaps: PSL, SFL, NUT 1.3. analyze the impact of communicable and non-communicable (infectious and chronic) diseases on the functioning of body systems. (REQUIRED TOPICS: Communicable: signs, symptoms and course of infection of HIV/AIDS; STD/STI and other communicable diseases. Non-Communicable: signs, symptoms and course of infection of HIV/AIDS; STD/STI and other communicable diseases. Required Topics: transmission, prevention; course of HIV infection leading to AIDS; opportunistic infections; risk of infection via blood products before and after 1985; testing and treatment of non-communicable: signs and symptoms of heart attack; stroke; 7 warning signs of cancer; different types of cancer; diagnosis and treatment of chronic diseases, e.g. diabetes, physically challenged individuals) CONTINUED</td>
<td>2.1. evaluate the validity of health information, products and services (REQUIRED TOPICS: treatment &quot;quackery&quot;; reliable sources) 2.2. analyze resources from home, school and community that provide valid disease prevention and control information (REQUIRED TOPICS: community agencies with missions to address certain diseases and disorders; teachers; school nurse; family physician) 2.4. demonstrate the ability to access school and community resources and services for self and others. (REQUIRED TOPICS: risk for STD/HSV of victim who has been sexually assaulted.) 2.5. analyze the cost and availability of products and services that prevent and/or control disease. (REQUIRED TOPICS: antiseptics, disinfectants; universal precautions; cost comparison of preventing disease vs. treating disease.) 2.6. analyze situations regarding professional health services (REQUIRED TOPICS: diagnosis and treatment of symptoms and diseases.) 2.7. identify career opportunities related to disease control and prevention.</td>
<td>3.1. analyze the role of individual responsibility for preventing disease. Communicable: (REQUIRED TOPICS: choices and consequences; behaviors leading to increased risk for STDs – numerous sexual partners; males who have had sex with other males; use of injected illegal drugs; infants born to infected mothers; unsafe sex; effect of substance use on judgment and exposure to risk. Non-communicable: lifestyle choices regarding exercise, nutrition, smoking, etc.) Overlaps: PSL, SFL, IN2, SAP, NUT Environmental: Conditions which produce environmental pollution 3.2. evaluate personal risk for communicable disease transmission. CONTINUED 4.1. analyze how cultural diversity enriches and challenges health behaviors related to disease control and prevention. (REQUIRED TOPICS: use of medical care; attitudes regarding prevention, early detection and screening; sexual behavior choices; how religion and other cultural practices influence health behaviors.) 4.2. evaluate the effect of media, peers and other factors on personal, family and community health. (REQUIRED TOPICS: promotion of high risk behaviors through TV, music and other media) 4.4. analyze how information from the community influences health. (REQUIRED TOPICS: understanding and using public health data to make personal lifestyle changes) 5.1. effective verbal and non-verbal communication skills to prevent transmission of disease. (REQUIRED TOPICS: listening skills; assertiveness; “T” statements; setting limits; refusal, negotiation and collaboration skills) Overlaps: MH, SFL 5.4. to communicate care, consideration and respect of self and others. (REQUIRED TOPICS: compassion, friendship and support of individuals with HIV, AIDS, other diseases and disabilities) 5.2. design methods for accurately expressing information and ideas about preventing disease. 5.3. utilize strategies to overcome barriers when communicating information, ideas, feelings and opinions about STDS, HIV/AIDS and other communicable and non-communicable diseases. 5.4. influence and support others in making positive health choices. (REQUIRED TOPICS: avoiding substances; seeking professional help/treatment; early diagnosis and treatment; changing unhealthy behaviors; reducing others’ risk for exposure to an infectious disease) Overlaps: PSL, NUT</td>
<td>6.1. effective prevention and control issues that require individuals to work together. (REQUIRED TOPICS: epidemics) 6.3. predict immediate and long-term impact of behaviors leading to risks for communicable and non-communicable disease on the individual, family and community. (REQUIRED TOPICS: factors and steps in decision-making; ongoing nature of decision making throughout lifetime) Overlap: MH 6.5. integrate information about disease prevention and control into an effective personal plan for a healthy lifestyle. Overlaps: PSL, NUT, IN2 6.2. design disease prevention and control issues that require individuals to work together. 6.3. predict immediate and long-term impact of behaviors leading to risks for communicable and non-communicable disease on the individual, family and community. (REQUIRED TOPICS: lifestyle choices) 6.4. organize methods for accurately expressing information and ideas about preventing disease. 6.5. utilize strategies to overcome barriers when communicating information, ideas, feelings and opinions about STDS, HIV/AIDS and other communicable and non-communicable diseases. 6.6. influence and support others in making positive health choices. (REQUIRED TOPICS: avoiding substances; seeking professional help/treatment; early diagnosis and treatment; changing unhealthy behaviors; reducing others’ risk for exposure to an infectious disease) Overlaps: PSL, NUT</td>

**STUDENTS WILL DEMONSTRATE THE ABILITY TO:**

1. Analyze how the family, peers, community and environment are interrelated with disease prevention and control. (*REQUIRED TOPICS*: nature and distribution of specific diseases can be associated with countries, occupations and lifestyles; the incidence of various diseases changes over time; effect of chronic disorders upon family and society; impact of disease and diagnosis of disease on the individual, family and society)

2. Analyze the short-term and long-term consequences of safe, risky and harmful behaviors.

3. Outline strategies for dealing with personal, family, community and environmental disease prevention and control. (*REQUIRED TOPICS*: primary and secondary prevention – early detection methods, e.g. mammograms, BSE, TSE, skin cancer screening; cholesterol screening; nutrition and exercise; testing for STD/STI, use of latex barrier e.g. condoms, what individuals, families, groups, industry, organizations and others in the community can do to positively impact the environment.)

4. Work cooperatively when advocating for healthy communities. (*REQUIRED TOPICS*: identifying community resources; community education) Overlaps: MH, INJ, PSL

"REQUIRED TOPICS" indicates that the content listed is the minimum amount required under state regulations; when topics are not listed, the outcome(s) establish(es) the minimum content for that standard.

Overlap: The content area of DISEASE CONTROL and PREVENTION lends itself to considerable overlap with other content areas, namely: PERSONAL HEALTH (PSL), MENTAL AND EMOTIONAL HEALTH (MH) and SEXUALITY AND FAMILY LIFE (SFL). Linkages with Social Studies, Science, Mathematics, English Language Arts, Family Life and Consumer Science are also possible.

**STUDENTS WILL DEMONSTRATE THE ABILITY TO:**

1.4. analyze how public health policies and government regulations influence disease prevention. *(REQUIRED TOPICS: immunizations; reporting laws; environmental health issues; federal, state and local regulations, laws and policies regarding the environment; federal, state and local agencies which address environmental concerns; “superfund sites”; local pollution clean-up issues)*

1.4. analyze how the public influences the development of public health policy and government regulation *(REQUIRED TOPICS: drafting of legislation regarding health issues; public outcry regarding the AIDS epidemic; “Ralph Nader”/history of consumerism movement in US; international issues regarding preservation of rainforests, including economics, politics and diplomacy)*

"REQUIRED TOPICS" indicates that the content listed is the minimum amount required under state requirements; when topics are not listed, the outcome(s) establish(es) the minimum content for that standard.

Overlap: The content area of DISEASE CONTROL and PREVENTION lends itself to considerable overlap with other content areas, namely: PERSONAL HEALTH (PSL), MENTAL AND EMOTIONAL HEALTH (MH) and SEXUALITY AND FAMILY LIFE (SFL). Linkages with Social Studies, Science, Mathematics, English Language Arts, Family Life and Consumer Science are also possible.
7. SUBSTANCE USE AND ABUSE PREVENTION
## HEALTH EDUCATION STANDARDS and SUBSTANCE USE AND ABUSE PREVENTION INSTRUCTIONAL OUTCOMES
### GRADES K - 4

**Overall Instructional Goal:** Students will understand the effect all chemical substances have on the body, the potential for substances to be abused, and the role of individual, family and community in substance abuse prevention.

</table>

"REQUIRED TOPICS" indicates that the content listed is the minimum required under state regulations; when topics are not listed, the outcome(s) establish(es) the minimum content for that standard.

Overlap: The content area of SUBSTANCE ABUSE PREVENTION EDUCATION lends itself to considerable overlap with other health content areas, namely: PERSONAL HEALTH (PSL), MENTAL AND EMOTIONAL HEALTH (MH) and SEXUALITY AND FAMILY LIFE (SFL). Linkages with Social Studies, Science, Mathematics, English Language Arts, Family Life and Consumer Science are also possible.
HEALTH EDUCATION STANDARDS and SUBSTANCE USE AND ABUSE PREVENTION INSTRUCTIONAL OUTCOMES
GRADLES 5 - 8

Overall Instructional Goals Grades 5 - 6: Students will understand the effect all chemical substances have on the body, the potential for substances to be abused, and the role of individual, family and community in substance abuse prevention. Overall Instructional Goals Grades 7 and 8: Students will also understand the factors involved in chemical substance use and prevention of substance abuse.

Grades 5 - 8

<table>
<thead>
<tr>
<th>Standard 1: Students will understand concepts related to health promotion and disease prevention as a foundation for a healthy life.</th>
<th>Standard 2: Students will demonstrate the ability to access valid health information and health-promoting products and services.</th>
<th>Standard 3: Students will demonstrate the ability to practice healthy information and health-promoting behaviors and reduce health risks.</th>
<th>Standard 4: Students will analyze the influence of culture, media, technology and other factors on health.</th>
<th>Standard 5: Students will demonstrate the ability to use interpersonal communication skills to enhance health.</th>
<th>Standard 6: Students will demonstrate the ability to use goal setting and decision making skills to enhance health.</th>
<th>Standard 7: Students will demonstrate the ability to advocate for personal, family, community and environmental health.</th>

"REQUIM TOPICS" indicates that the content listed is the minimum required under state regulations; when topics are not listed, the outcome(s) establish(es) the minimum content for that standard.

Overlap: The content area of SUBSTANCE ABUSE PREVENTION EDUCATION lends itself to considerable overlap with other health content areas, namely PERSONAL HEALTH (PSL), MENTAL AND EMOTIONAL HEALTH (MH) and SEXUALITY AND FAMILY LIFE (SFL). Linkages with Social Studies, Science, Mathematics, English Language Arts, Family Life and Consumer Science are also possible.
Standard 1: Students will understand concepts related to health promotion and disease prevention. (REQUIRED TOPICS: HIV transmission; depression; injuries)
Overlaps: PSL, DCP, SFL

Standard 2: Students will analyze the role of individual responsibility for personal health behaviors. (REQUIRED TOPICS: choices and consequences; effects of drugs on other aspects of behavior; judgment, and reason)

Standard 3: Students will analyze the impact of substance use behaviors. (REQUIRED TOPICS: drugs and medicines in various cultures; cultural attitudes and practices about drug use; drug use in history; impact of ATOD on family, society.)

Standard 4: Students will analyze how interpersonal communication affects relationships. (REQUIRED TOPICS: conflict resolution)

Standard 5: Students will use skills for communicating effectively with others in making positive health decisions related to substance use. (REQUIRED TOPICS: coping with stress; relationships)

Students will understand the concepts related to health promotion and disease prevention. (REQUIRED TOPICS: HIV transmission; depression; injuries)

Overlaps: PSL, DCP, SFL

1.1. analyze how substance use can impact health and disease prevention.
(REQUIRED TOPICS: smoking, alcohol, caffeine, tobacco, and other drug use)

1.2. describe the impact of substance use on the interrelationships of mental, emotional, social and physical health throughout young adulthood.

1.3. analyze the impact of substance abuse on the functioning of body systems.
(REQUIRED TOPICS: effect on performance, concentration, communication, etc.; depression; effects of chemical substances on brain function; commonly abused drugs; illegal drugs; short- and long-term effects of substances including: tobacco, alcohol and caffeine; habits; dependency; tolerance; addiction; withdrawal)

1.4. examine how the family, peers, community and environment influence substance use behaviors of individuals.
(REQUIRED TOPICS: patterns of alcohol, tobacco and caffeine use; peer pressure; current social and health problems - cancer, drunk driving, fetal alcohol syndrome, HIV/AIDS)

2.1. analyze resources from home, school and community that provide valid substance abuse information.
(REQUIRED TOPICS: different types of available assistance; elements and rationale of support systems)

2.2. analyze situations requiring professional health services.
(REQUIRED TOPICS: seeking help in reaction to signs of substance abuse.)

2.3. analyze situations and consequences of risky and harmful behaviors.
(REQUIRED TOPICS: drug laws and their purpose; effects of alcohol and other drugs on judgment, driving, etc.; personal feelings and attitudes about substance use).

2.4. outline strategies for dealing with drug emergencies and crises.
(Overlaps: INJ, PSL)

2.5. analyze how community and peer norms influence substance use behaviors.
(REQUIRED TOPICS: socially accepted/non-accepted uses of various substances)

2.6. explain how cultural diversity enriches and challenges substance use behaviors.
(REQUIRED TOPICS: drugs and medicines in various cultures; cultural attitudes and practices about drug use; drug use in history; impact of ATOD on family, society.)

2.7. explain how communities and peer norms influence substance use behaviors.
(REQUIRED TOPICS: socially accepted/non-accepted uses of various substances)

3.1. analyze the role of individual responsibility for personal health behaviors.
(REQUIRED TOPICS: choices and consequences; effects of drugs on other aspects of behavior; judgment, and reason)

3.2. evaluate personal substance use to determine strategies for enhancing health and reducing risk.
(REQUIRED TOPICS: use of caffeine, nicotine, alcohol, medicines and their effects on health; illegal substances.)

3.3. analyze the short-term and long-term consequences of risky and harmful behaviors.
(REQUIRED TOPICS: drug laws and their purpose; effects of alcohol and other drugs on judgment, driving, etc.; personal feelings and attitudes about substance use).

3.4. outline strategies for dealing with drug emergencies and crises.
(Overlaps: INJ, PSL)

3.5. develop strategies to address substance use in individuals.

4.1. use skills for communicating effectively with others in making positive health decisions related to substance use.
(REQUIRED TOPICS: coping with stress; relationships)

4.2. analyze how interpersonal communication affects relationships.
(REQUIRED TOPICS: conflict resolution)

5.1. use skills for communicating effectively with others in making positive health decisions related to substance use.
(REQUIRED TOPICS: coping with stress; relationships)

5.2. communicate care, consideration and respect for self and others.
(REQUIRED TOPICS: e.g. not using substances; not pressuring others to use)

5.3. demonstrate strategies for solving interpersonal conflicts without harming self or others.
(Overlaps: INJ)

5.4. communicate care, consideration and respect for self and others.
(Overlaps: INJ)

5.5. develop strategies for solving interpersonal conflicts without harming self or others.
(Overlaps: INJ)

6.1. analyze the ability to use multiple strategies when making health-related decisions related to substance use.
(REQUIRED TOPICS: to use)
